

NEW GARMENTS FOR OUTING USE

Modish Sports Coats and Sweaters That Reflect All the Gay Colors of the Spectrum Are Now In the Shops.

As spring approaches the girl who goes in for outdoor sports is turning her thoughts to the selection of suitable garb for the mild days when golf, tennis, polo, motoring or walking may be again enjoyed. For the cool days of early spring warm garments are essential.

With a modish coat and hat the girl in moderate circumstances may consider her spring equipment complete. Supplied with these, even if the skirt is not of the latest cut or the most up to date fabric, it will hardly be noticed.

Though the Norfolk in one of its many modifications is the favorite sports coat since the demise of the mackinaw, many of the jaunty little jackets so popular can be adapted from other styles.

The newest coats show a belt which hangs loosely at the low waist line, sometimes encircling the hips rather than the waist. One of the latest models, a bright brick red corduroy, has a girle fully six inches wide.

The yoke effect is one of the new features in sports coats. It was brought into existence by the Norfolk, but has been developed in other models. A clever combination shows the yoke extended to form the upper part of the sleeve. This gives the much desired raglan shoulder effect to the top of the sleeve and the kimono lines to the under section, which is cut in one piece with the body of the garment.

All of the coats are distinguished by their looseness, especially through the shoulders. They appear almost to be slipping off and certainly to have been

SMART SPORTS COAT.

made for a woman several sizes larger than the wearer. When this looseness is not taken care of by the plaits, as in the Norfolk jacket, it is gathered, apparently carelessly, into the wide belt, giving the effect of an exaggerated Russian blouse. The skirt portion is sure to flare, though in a sports coat not to any very marked degree.

There is much beauty in both the woolen and the silk sweaters, particularly in the Angora wool sweaters, which have quite taken the place of the old time knitted sweater. There is not a tone in the rainbow that is not reflected from these sweaters, the soft and delicate old rose, Persian blue, silver green and golden brown tints vying with the more blatant brick red, Tintan blue, tango yellow and Russian green. The Angora wool seems to take the subtle, "faded" colorings of the east particularly well, and the manufacturers have shown unusual skill in color combinations. Though the striped and checkered effects have been produced in the Angora wool sweaters, the results are not so successful as in the silk sweaters.

Dark green suede cloth was used for this single breasted coat, with its turned over collar, little belt vest and wide belt of velvet. The vest is fastened with a row of large ball buttons.

Making Over a Dress.

When turning an old dress first hold the material up to the light and find out where the parts are faded and spotted. When a place is seen encircle it with a basting thread of a bright color that differs from the color of the garment. The spot will be quickly seen when the garment is being remade and care can be taken that it does not come in a conspicuous part of the fresh blouse or dress.

RACE TO MEXICO CITY.

General Aguilar is Anxious to March From Tuxpan Upon the Capital City. General Candido Aguilar, the rebel conqueror of Tuxpan, is casting longing eyes upon Mexico City and is ambitious to win the race to the capital over Villa, Zapata and Obregon.

The towns of Tantima and Tantoyuca, in the state of Vera Cruz, have been captured by General Aguilar. He has occupied a large portion of the country, has established civil and military authorities in office and offered full guarantees to commerce and industries. All railroad and telegraph lines as far south as the northern part of Hidalgo have been opened to traffic, and General Aguilar was given orders to push the campaign against the federalists to the south.

Aguilar's plan of campaign is to make an advance westward through the oil region into the state of Hidalgo, where

GENERAL CANDIDO AGUILAR.

he will be aided by the Maderista ex-governor, Rosales, commanding 1,400 Hidalgo rebels; then on through the rich mining district of Pachuca, where the federal garrison of 2,000 is being re-enforced by recent levies from the Serrano Indians, numbering 1,400. These Indians are undisciplined and poorly equipped and will be more than offset by the miners who will join the Aguilar forces.

After passing the swampy oil region west of Tuxpan, Aguilar's advance will be comparatively easy if the federalists continue their retreat. The whole distance could be covered in a week, but Aguilar may be tempted to defect his advance and attack Puebla's weakened garrison, a capture far more important than anything else in that region. Puebla is but a little over 100 miles to the south from Tuxpan and is but sixty miles from Mexico City.

RESTORING KEY'S FLAG.

The Original Star Spangled Banner is to Have a New Birth.

Work on the restoration of the original star spangled banner which floated from the flagstaff at Fort McHenry when Key wrote the national anthem was recently begun at the Smithsonian Institution, Washington.

The flag measures 29 by 36 feet, the stars being two feet across from point to point, and the stripes two feet wide, and, according to the officials at the institution, it is the largest flag they knew ever to have been in action. It was deposited in the Smithsonian by

THE ORIGINAL STAR SPANGLED BANNER AND THE FRIGATE CONSTELLATION.

Eben Appleton, the grandson of Colonel George Armistead, who was commandant of Fort McHenry at the time.

The bill for the restoration of the frigate Constellation, the oldest ship in the United States navy, which is to be towed to Baltimore from Newport, R. I., has passed the house and is now before the senate.

In the office of the architect of the war department maps of Fort McHenry, dating back as far as 1803 and 1819, have been found. They will be used in laying out the grounds of the fort for a park.

President Wilson has signed the bill granting Fort McHenry to the city of Baltimore as a park. The bill passed both houses of congress and has the approbation of the war department.

CHINA TO SPEND \$800,000 IN MARVELOUS DISPLAY AT THE PANAMA-PACIFIC EXPOSITION.

TING CHI CHU, commissioner of China to the Panama-Pacific Exposition, states that China's representation at the Exposition will entail an outlay of \$800,000, of which at least \$300,000 will be expended on the Chinese pavilion, shown above. Chu is a graduate of Harvard. Mrs. Chu, as Miss Ping Hu, graduated from Wellesley college in 1913.

COLOSSAL STATUARY FOR PANAMA-PACIFIC EXPOSITION.

INTERIOR of one of three studios at the Panama-Pacific International Exposition to open in San Francisco next year, showing the partially completed figures, some of them thirty feet in height, which will adorn the vast courts.

How the Ball Players Stack Up

The individual averages and records of the players of the Dallas team form some interesting reading, and will give the fans an idea of how each man is holding down his position on the team. The averages have not been figured out, except the batting average of each player. The other figures represent the totals in all games played this season.

Player	Games	PO.	A.	E.	AB.	R.	Hits	SB.	SH.	BA.
Woods	11	16	26	10	35	4	4	2	0	114
F. Cooper	6	13	17	7	21	4	7	6	1	333
Rice	12	13	17	5	45	3	9	1	2	200
Serr	12	108	19	14	41	7	14	2	5	341
Boydston, R.	13	96	13	10	46	7	13	3	3	282
Tooze	12	19	5	4	48	7	17	10	0	354
Barham, W.	9	11	2	3	26	4	7	3	2	269
Myers	13	9	33	6	46	6	10	3	2	217
Baker, G.	5	23	11	1	13	7	2	2	1	154
Tuerck	2	1	3	0	7	2	3	1	1	428
Bigbee	1	2	0	0	5	1	1	2	0	200
Fenton	2	9	2	0	8	1	3	1	0	375
Baker, Tom	1	1	3	1	3	0	0	0	0	060
Shaw, E. E.	3	2	0	1	9	1	3	4	0	333
Hayes, Jack	4	2	3	3	12	1	1	0	0	83
Boydston, Fred	1	3	1	1	4	1	3	1	0	750

Several of the above named have not played the same position during the whole season. Rice has played on third base in a couple of games; Tooze has played first and third; Myers has played in the field one whole game,

NATIONS OF FAR EAST TO EXHIBIT IN 1915.

The commission sent by the United States government to the nations of the far east to request their participation in the Panama-Pacific International Exposition at San Francisco next year returned to New York May 12, bringing news that eight of those governments will be represented.

The commissioners, including ex-Governor Alva Adams of Colorado, Thomas G. Stallsmith, chief of the agricultural department of the Exposition, and Welton Stallsmith, secretary, gave out the following list of countries, with the appropriations made by each:

China	£,000,000
Philippine Islands	600,000
Japan	600,000
Australia	450,000
Siam	250,000
Dutch East Indies	250,000
New Zealand	200,000
Cochin China	150,000

This brings the total number of foreign countries which have decided to participate officially up to thirty-six, Austria being the latest to swing into line, with an appropriation of \$400,000, half of which is contributed by commercial organizations.

THE LARGEST GLASS BUBBLE IN THE WORLD.

STEEL framework of the great dome of the Palace of Horticulture at the Panama-Pacific International Exposition, San Francisco, 1915. The dome is the largest ever constructed, being 152 feet in diameter and 186 feet high and surmounted by a basket thirty feet in diameter, which will be filled with growing flowers. The dome, lighted from within by whirling colored lights, will resemble a huge fire opal.
