BIG FUTURE FOR LUMBER

IN 10 YEARS NORTHWEST WILL FURNISH HALF OF OUTPUT

Prediction at Spokane Conference Yesterday Was Surprise to Lumbermen of the Coast.

Chiefs of the lumber industry of the east and middle west told representative lumbermen of the northwest at a conference in Spokane yesterday that within ten years the Pacific manufacturers would be called upon to produce one-half of the lumber output of the United States against a present production of one-sixth of the nation's cut.

This was the most startling information developed from the day's conference on questions of present and future production and consumption... of the northwest at present...

Eastern manufacturers were afterwards entertained at a banquet at which they stated their purpose in coming on this trip, which is to take them to Seattle and other coast points, is the stimulation of the lumbermen to a realization of the possibilities of their industry and to expand the demand for their product.

Their efforts are a feature of the national campaign to put lumber before all communities and cities as the ideal building material. They will conclude their conferences in Spokane today.
