DO SOME DEEP THINKING.

Help Your Mind by Going Into a "Brown Study" Once in a While. "If the 'brown study' were more often cultivated many people would be happier and more clear thinking would be done," says the London Lancet. "It is in such a state that truths dawn suddenly and clearly upon the unclouded intelligence. It is in such a state that mighty actions are conceived, poems born at a stroke and mankind enlightened through the enlightenment of the individual."

"In this state of mind there is such a concentration of mental energy that the body is ignored. The mind, on the other hand, is so working upon the subject which concerns it, is so intent upon its own affairs, that the external world is obliterated, and any bodily discomfort that may have been pre-existing is now negligible and unnoticed." The Lancet says the relationship between mental activity and the bodily state is not realized with sufficient frequency or with sufficient thoroughness by the European of today. "The average man is too engrossed with his bodily pabulum, and in caring for the needs of the body he neglects the needs of the mind."

Wisdom Teeth.

The wisdom teeth are the two last molar teeth to grow. They come one on each side of the jaw and arrive somewhere between the ages of twenty and twenty-five years. The name is given them because it is supposed that when a person has developed physically and mentally to the point where he has secured these last two teeth he has also arrived at the age of discretion. It does not necessarily mean that one who has cut his wisdom teeth is wise, but that, having lived long enough to grow these, which complete the full set of teeth, the person has passed sufficient actual years that if he has done what he should to fit himself for life he should have come by that time at the age of discretion or wisdom. As a matter of fact, these teeth grow at about the same time in people whether they are wise or not.

Knights Templars.

During the latter half of the eleventh century pilgrims to Jerusalem began to be persecuted by the Turks or Saracens then in possession of the Holy Land. Nine noble knights formed a brotherhood with the object of protecting the pilgrims. The cause spread rapidly over Europe, and the knights grew to legions in number. Vows of chastity, obedience and poverty were taken, and the order, from merely protecting the pilgrims, took upon itself the task of recovering the Holy Land from the grip of the infidels. About 1120 they were given a place in the enclosure of the temple on Mount Moriah, and hence the name Templars, or Knights of the Temple of Solomon.
