Oregonian Stupidity.

The Oregon legislature has refused appropriation for some of its state normal schools, thereby closing well-established plants. If any other state has ever been thus stupid it has escaped our notice. Two years ago, through the application of their crude referendum law, the schools did

not get their appropriation for a year, and some of the schools were closed, but this time they are closed out by legislative neglect or vicious activity. And they have not provided extra for the other normal school. It is not to be wondered at that scores of Oregon young people have removed to Washington, and taken up residence there in order to have advantage of their normal schools.—National Journal of Education.
