P. E. Chase and the Bakery both sport new soda fountains and Mission Oak (?) counters, but it doesn't matter about the kind of counters they have they dispense fine soda over them just the same. The counters are the work of John Howell and show what elegant effects can be produced from native Oregon wood.

J. P. Walker, of Monmouth Heights presented this office with a box of fine Marshal strawberries Monday morning. These berries were from the first years crop grown by Mr. Walker and were finely flavored and of very large size. The Marshal is a sub-acid berry and fine for table use, although not so good for canning as the Clark's Seedling. This is largely due to their immense size and to the fact that where they are so large many of them are not solid clear through. This variety bids fair to become quite popular for table use and will bear shipping very well.

J. Nichols writes the Herald that he is now located at Kelseyville, California and wants his paper sent there so that he can keep track of his friends. He is now located in the midst of the bean growing section of Lake county and will no doubt acquire a taste for this Bostonese dainty.

The Herald job office is still doing a little job work. We had expected to be able to take a rest after getting out the June issue of the Courier, but it seems otherwise, as we now have ahead of us nearly 40,000 impressions and have had to turn work away this week, being unable to do it. The main reason why we get so much to do is because we do just as good work as can be had anywhere in the county and for a considerable less money.

The quarterly report of Fred Huber, rural carrier on route 1, shows a fine condition of business. During the past three months he delivered 4007 letters, 2832 newspapers, 2179 circulars and 518 packages. During the same period he collected 2390 letters, 1230 postal cards and 56 packages, or a total of 23004 packages handled during that time and sold \$72 worth of stamps, etc. This entitles him to deliver without counting his packages until ordered to do so by the postal authorities. It will save considerable work to the carrier and it is a record to be proud of.

Alie Griffith brought in from A. J. Shipley's Alpine Berry Farm, Tuesday, a box of mammoth Marshal strawberries for the sole use and behoof of the editorial family. Mr. Shipley, we believe, was the first to introduce this fast becoming popular berry in this part of the state. He states that they can very nicely and that he prefers them to Clark's Seedling as grown by him. However there is a vast difference in soil and as Mr. Shipley's farm is admirably adapted to the growing of Marshals in their most perfect state it may be that they do better for him than for others.
