One Hundred Years Ago

there were no tan shoes, except those made of tan bark.

Shoes in those days were made by cobblers. They were clumsy and did not look as trim and neat as those worn today.

Tan leather used in tan shoes today is tanned by a chemical process, which makes the leather much stronger and more pliable. Today they are manufactured in large modern factories with the latest machinery, by expert workmen. They are made over lasts that conform to the foot.

We carry a complete line of tan "Star Brand" Shoes for Men and Women.

If you are looking for anything in tan come in and see us. Our prices are right; also the shoes—they are "Star Brand".
