## A BIG CUT

Saturday we came in from some outside work and found the job press covered with some of the finest potatoes we have seen for many a day. The only explanation we could find as why they were there was the name of O. M. Lehman, Pleasant Valley, written on the tympan of the press. Now if our friend Lehman left these potatoes he would better look out for he may have a damage case on his hands, for it wouldn't take many more such as they to break down the table on the press. However we will forgive him this time on account of the excellent flavor and cooking qualities of the samples. Monmouth and vicinity can produce some of the finest fruit and vegetables of any part of the state and it will soon become noted for its products far and near.
