HARBOR VIEW SITE OF THE EXPOSITION, WHERE THE MIDWAY AND CONCESSIONS WILL BE LOCATED.

STARTING WORK ON THE PANAMA

Every Country on Earth to Be Represented at the Greatest World's Fair in History. Eighty Million Dollars to Be Expended on National Celebration.

THE NATION'S BIG EXPOSITION

Composite Fleet of Navies of the World to Pass Through Panama Canal and Enter San Francisco Harbor. What the Great Fair Will Be Like.

WITHIN a few weeks' time thousands of men and teams will be engaged in leveling off the grounds of the Panama-Pacific International exposition site in San Francisco, and it is estimated that within six months 10,000 men will be employed in the construction of the material part of the great exposition at which the United States of America will celebrate the opening of the Panama canal. Responses to invitations to participate and offers of co-operation from every part of the world are flooding the exposition management, and President C. C. Moore and his thirty directors, who represent every important interest on the coast and \$1,000,000,000 in invested capital, are working night and day to keep up with the avalanche of duties that pour in upon them.

Responses of foreign countries surpass all anticipations of the exposition management. Every civilized nation on earth, every land within the sweep of both shores of the Pacific ocean and every state in the Union will be represented by the finest assemblage of displays the world has ever seen. "San Francisco," says President Moore, "as hostess for the nation will entertain the world in 1915 with the most comprehensive exposition in history, a jubilee of nations, a splendid commemorative celebration, which shall include not only the finest features of all former world's exhibitions in recording the progress of the world, but yet in magnificence, in diversity, in its distinctive color of the west, of the orient and of all the countries bordering upon the Pacific ocean will stand alone. The nations of the world will see the finest American displays ever shown at the Panama-Pacific International exposition.

"The plans of the people of the west for the Panama-Pacific International exposition are being undertaken upon a scale of world education and interest, and the exposition is the subject of enthusiastic co-operation in every

land upon the earth. San Francisco is preparing to meet the standards of a great national celebration. Every land under the stars and stripes will be represented, and the nations of the world are intensely interested in the Panama canal, America's gift to civilization, and in the exposition at which America will formally celebrate the opening of the canal. This universal interest has assured the most remarkable world's exposition in point of size, diversity and specific interest ever held."

The opening of the Panama canal will not only be the most important commercial event in the history of the world, but it will mark a supreme epoch in the lives of the nations bordering upon the Pacific, and appropriately the visitor will see in the exposition the greatest displays of strange tribes and peoples of the Pacific ocean countries ever assembled.

Down the streets of San Francisco in exposition days will pass such oriental pageants as the world has never seen. China, Japan, the Philippines, India and other oriental lands will join in parades that will rival the Indian durbar in magnificence and surpass the durbar in variety by reason of the many nations represented.

The exposition will formally open with the entrance into San Francisco harbor of a composite fleet of the battle-ships of the world. Upon invitation of the United States nearly 100 warships of foreign nations will first assemble at Hampton Roads and will be joined by detachments of the American navy, and the composite fleet will then be reviewed by the president and by foreign dignitaries. This fleet, the largest ever assembled, will proceed through the Panama canal, arriving in San Francisco harbor about two weeks after the exposition opens.

The exposition will be held upon the shores of San Francisco bay and of the Pacific ocean and will occupy an area of more than 1,000 acres. The grounds will describe a semicircle about San

Francisco, following the contours of the shore from the harbor out to and beyond the Golden Gate. The structures will be the largest and costliest ever erected for a world's exposition.

The two principal locations of the exposition will be at Harbor View and in Golden Gate park. Harbor View lies as a crescent on San Francisco bay midway between the ferry building, the principal entrance to San Francisco, and the Golden Gate. Golden Gate park fronts the Pacific ocean one mile below the famous Cliff House. These two main sites and intermediate locations will be connected by a marine boulevard that will skirt the shores of San Francisco bay and also by an interurban railroad. A trackless trolley will run over the boulevard. Harbor View is within twenty minutes' walk of the Fairmont hotel and the most extensive apartment house section of San Francisco.

At Harbor View will be located a yacht harbor, the Midway and night life of the exposition and many concessions that lend themselves to night illuminations as well as great buildings to house such heavy exhibits as may be readily unloaded from ocean going vessels, such as the structures to contain the manufactures and machinery exhibits, the Palace of Liberal Arts and other industrial features.

Golden Gate park will be the seat of the permanent features of the exposition. With an area of more than a thousand acres Golden Gate park, forested and created of sand dunes, today presents one of the most notable achievements in landscape gardening in the world. The west end of Golden Gate park, comprising 540 acres, will be utilized for exposition purposes. Around a great stadium, already built, will be erected a huge concrete coliseum, the largest structure of its kind in America, capable of seating 75,000 people and in architecture like that at Rome. A chain of lakes at different levels will be connected by a working model of the Panama canal.

Lincoln park, where the Golden Gate rounds out into the Pacific ocean, commands a panorama of the Pacific ocean, of San Francisco harbor and of the hills of the city. Its area is 150 acres, and its contours rise more than 300 feet above sea level. At Lincoln park will be erected a great commemorative statue welcoming ships to the Golden Gate. Tentative plans for St. Francis memorial tower call for a structure 820 feet in height, with a base 200 feet square. The top of the tower will be almost 1,300 feet above the waters of the Golden Gate.

From Lincoln park the boulevard, turning south toward Golden Gate park, will pass through an area of 200 acres that have been secured by the directors for exposition purposes. Here will be located the foreign buildings, live stock exhibits, mining, horticulture and agriculture and other displays requiring extensive space.

NOTICE TO CREDITORS.

Notice is hereby given that the undersigned has been duly appointed administratrix in the estate of Silas D. Coats, deceased, by the County Court of the State of Oregon for Polk County, and has qualified as such.

All persons having claims against the said estate are hereby notified to present the same duly verified, together with the proper vouchers therefor, to the undersigned at her residence at Monmouth, in said County, within six months from the date of this notice.

Dated and first published February 16th, 1912.

MARY H. MEADOR,
Administratrix of the estate of Silas D. Coats, deceased.
B. F. SWORE, Attorney.

DR. L. W. HORN,

Veterinary Surgeon

Crowley Bros. Livery Barn,

Independence, Oregon.

Circumstantial Evidence.
A Scotchman and his wife were visiting in a wild, beautiful part of the country. While driving one day with their host, the two men sitting together in the front seat while the lady sat behind, they crossed a high bridge which spanned a roaring torrent. An unusually loud splash caught the gentleman's attention for a moment, but nothing was said. After several miles the gentleman turned to address a remark to his wife, but her seat was empty.

"Aye," he remarked to his host, "that will be yon splash we heard."—Housekeeper.

Not So Easy as It Seemed.
Twelve persons decided to lunch together every day and agreed not to sit twice in the same order. One of the number, a mathematician, surprised his associates by informing them that their decision meant that one and one-third million years must elapse before they would again be seated in the original order. Two men can sit together only in two different ways, three in six ways, four in twenty-four, five in 120, six in 720, seven in 5,040, eight in 40,320, nine in 362,880, ten in 3,628,800, eleven in 39,916,800, and twelve in 479,100,600.—Pearson's.
