### New Type of Oil.

The oil from the large well recently drilled by the Myles Mineral Co. at Pine Prairie, La., is remarkable, according to an analysis made by the United States Geological Survey, in that it contains no asphalt, gasoline, or paraffin wax. The crude product contains a very large percentage of illuminating oil. In composition the oil stands about halfway between the oil of the Gulf field and that of the Caddo field.

The well has been connected with pipe lines and loading rack on the Rock Island Railroad, from which shipments are now being made. Eight other wells are in process of drilling.
