

John Deere Spreader

The Spreader with the Beater on the Axle

Order Early

Thousands Sold for Quick Delivery

Two Sizes

The Simplest Spreader Made

No Clutches No Chains
No Adjustments

Easy to Load Roller Bearings
Light Draft

Decided Improvement in Spreader Construction

Up to this time every spreader on the market has been constructed along the same general lines. The John Deere Spreader, however, is different. It is entirely new and there is nothing else like it on the market.

All the working parts are mounted on the main axle. There are no strains and stresses on the sides of frame and no clutches or chains to give trouble. The John Deere Spreader is low down, easy to load, very simple, and always ready for business. It cannot get out of order.

Beater on Axle

Beater on Axle

All working parts on the John Deere Spreader are mounted on the rear axle. There are no independent studs or shafts to give trouble, nor chains or sets of gears to get out of order. All strains and stresses are borne by the main axle and are not transmitted

to the side of the box or the frame of the spreader. Power to drive the beater is taken from the rear axle and operates through a planetary transmission (similar to that used on automobiles) mounted on the rear axle within the beater.

Light Draft—Few Parts

There are at least two reasons why the John Deere Spreader is the lightest draft spreader made. One is that it has four sets of roller bearings—two in the front wheels and two on the main axle and beater. They reduce the draft materially.

Another reason is that the John Deere Spreader has so few parts. It has about 150 less types of castings than the simplest spreader heretofore made. It is only natural that the fewer parts a machine has, the easier it will operate.

When the John Deere Spreader is out of gear, it is simply a wagon.

The first three feet manure is lifted with an ordinary spreader are easiest of all. The real hard work is from this height to the top of the ordinary spreader.

The John Deere Spreader is low down. It is only necessary to lift each forkful three feet. Thus, the hard work of loading a manure spreader is done away with. Besides, the person doing the loading can see inside the spreader at all times. Each forkful is placed exactly where it is needed.

On the John Deere Spreader no adjustments are necessary. On the simplest spreader heretofore made, it was always necessary to make from ten to twenty adjustments before the machine would work at all.

John Deere Spreader is thrown in gear by moving a heavy dog back until it engages a stop at the rear of the machine. No clutch used.

By the use of a very simple locking device inside the ratchet feed, the apron is positively locked against racking when spreading up hill or over exceedingly rough ground. The result is that when spreading with the John Deere Spreader, the manure is always spread evenly. This is not possible on any other ratchet feed spreader made.

Change of Feed

Change of feed is accomplished by a double shoe which is removed from the seat. This shoe determines the number of teeth the ratchets engage at each stroke. The John Deere Spreader has a variation of from five to twenty-five loads to the acre.

Substantial Steel Frame, Like the Modern Railway Bridge

Both the side sills in the John Deere Spreader are of high carbon channel steel with the channels turned to the inside. Into these hollows are fitted four large wooden cross sills. Being bolted, these cross sills can be kept tight, insuring rigidity and alignment of frame at all times.

Built Like a Steel Bridge

Even if You Don't Need a New Spreader Now—Come in and See It

MONMOUTH, OREGON

Local and Personal

Zook the Painter, will hang your paper for you.

V. O. Boots was an Independence visitor Wednesday.

S. R. Walker is still on the mend and gives promise of soon being up and around again.

A bay mare belonging to E. B. Bedwell has strayed away and he has not been able to locate her.

The hole in the window may cause you to catch cold. Glass cut to any size at the PERKINS PHARMACY.

Verd Hill, of Independence, was on the train Wednesday, bound for the county seat to learn the election news.

George Winters, one of the Normal students, went to King's Valley, Monday, to serve as clerk of election there Tuesday.

Mr. and Mrs. Edward Bork were the recipients of a baby girl, which arrived early on election morn, November 5.

The Elkins school district received twenty-five dollars, a few days ago, the prize awarded for the best display at the fair. A further award of ten dollars was won on articles made by the pupils of the school.

Mrs. D. M. Hewitt returned home, Saturday, from a few days visit with her sister, Mrs. M. Morrison, of Eugene. Mrs. Morrison has been very ill for some time but was some better when Mrs. Hewitt returned.

Hon. Ira C. Powell was a visitor somewhere, Saturday and Sunday, but he gave nothing away to the HERALD reporter, further than that he is soon to go again which in itself is rather suggestive, when taken into consideration that he is eligible.

Christian Endeavorers Entertain.

Saturday evening, Nov. 2, the Christian Endeavor society entertained at a Halloween party in their room in the Christian church. It was represented to be a "Ghost Party," and all were supposed to come masked, but not one of the boys present obeyed orders. They spent a very enjoyable time, however, in trying to find out who the girls were that came masked. The room was tastefully decorated with jack-o-lanterns, leaves and paper imitations of witches, owls, etc. About 40 of the members and friends were present and enjoyed the evening in playing games. Refreshments of pumpkin pie, doughnuts and cider were served, and at a late hour they departed for their homes, assuring the Social committee that they had had a very pleasant time.

Returned From Nome.

Mrs. Roy Addison and son, Harold, returned to their home about 4 miles south of Independence, Saturday. The family have been spending the summer in Nome, Alaska, and became homesick for the Willamette Valley and Independence. Mr. Addison stayed over in Portland for a few days looking after business interests there. Mrs. Addison and Harold came on home and took everybody by surprise. They visited with Wm. McKinney and wife during the day. On the boat, a grand reception was given for Harold in honor of his birthday and everything was served that he ordered, such as turkey, ice-cream, dates, candies, almonds, and other things too numerous to mention.—Independence Monitor.

Roy was the guest of Mr. J. H. Moran and sister one day last

week. Mr. Addison contemplates returning to Nome next spring. He met several Oregonians at Nome, among whom was Saul Stump, a former resident of Monmouth.

Monmouth Heights

George Heck was an Independence visitor Saturday.

Mr. McKarney, of Independence, is cutting wood for Dave Dove.

Mr. and Mrs. V. A. Fishback, of Lewisville, spent Sunday with relatives here.

Robert Fishback spent several days of last week with relatives at Carlton and Newberg.

Mrs. Clarence Bruce and children, of Oakdale, visited with friends here Saturday and Sunday.

Miss Millie Clark, of Monmouth, visited with her sister, Mrs. Retta Hamar, several days last week.

Mrs. Guy Hewitt and Mrs. Jesse Johnson, of the Luckiamute, were guests of Ina Fishback, Friday.

Miss Kathryn Campbell, of Monmouth, began teaching the Antioch school Monday. Mr. Elliott having resigned on account of ill health.

Mrs. Cornelia Ireland Dead.

The remains of Mrs. Cornelia Ireland were brought here Monday for interment, from Corvallis.

Deceased, with her husband, W. P. Ireland, was a former resident of this locality, and well-known to all the old residents of Monmouth and vicinity.

The funeral services were conducted by Rev. E. C. Wigmore, of Eugene, who was formerly pastor of the Christian church here for a period of four years.
