

John Deere Spreader

The Spreader with the Beater on the Axle

Order Early

Thousands Sold for Quick Delivery

Two Sizes

The Simplest Spreader Made

No Clutches No Chains
No Adjustments

Easy to Load

Roller Bearings
Light Draft

Decided Improvement in Spreader Construction

Up to this time every spreader on the market has been constructed along the same general lines. The John Deere Spreader, however, is different. It is entirely new and there is nothing else like it on the market.

All the working parts are mounted on the main axle. There are no strains and stresses on the sides of frame and no clutches or chains to give trouble. The John Deere Spreader is low down, easy to load, very simple, and always ready for business. It cannot get out of order.

Beater on Axle

All working parts on the John Deere Spreader are mounted on the rear axle. There are no independent studs or shafts to give trouble, nor chains or sets of gears to get out of order. All strains and stresses are borne by the main axle and are not transmitted

to the side of the box or the frame of the spreader. Power to drive the beater is taken from the rear axle and operates through a planetary transmission (similar to that used on automobiles) mounted on the rear axle within the beater.

Light Draft—Few Parts

There are at least two reasons why the John Deere Spreader is the lightest draft spreader made. One is that it has four sets of roller bearings—two in the front wheels and two on the main axle and beater. They reduce the draft materially.

Another reason is that the John Deere Spreader has so few parts. It has about 150 less types of castings than the simplest spreader heretofore made. It is only natural that the fewer parts a machine has, the easier it will operate.

When the John Deere Spreader is out of gear, it is simply a wagon.

Easy to Load

The first three feet manure is lifted with an ordinary spreader is easiest of all. The real hard work is from this height to the top of the ordinary spreader.

The John Deere Spreader is low down. It is only necessary to lift each forkful three feet. Thus, the hard work of loading a manure spreader is done away with.

Besides, the person doing the loading can see inside the spreader at all times. Each forkful is placed exactly where it is needed.

Easy to Load

Out of Gear

No Adjustments

On the John Deere Spreader no adjustments are necessary. On the simplest spreader heretofore made, it was always necessary to make from ten to twenty adjustments before the machine would work at all.

John Deere Spreader is thrown in gear by moving a heavy dog back until it engages a stop at the rear of the machine. No clutch used.

Positive Non-Racing Apron

By the use of a very simple locking device inside the ratchet feed, the apron is positively locked against racing when spreading up hill or over exceedingly rough ground. The result is that when spreading with the John Deere Spreader, the manure is always spread evenly. This is not possible on any other ratchet feed spreader made.

Change of Feed

Change of feed is accomplished by a double shoe which is removed from the seat. This shoe determines the number of teeth the ratchets engage at each stroke. The John Deere Spreader has a variation of from five to twenty-five loads to the acre.

Substantial Steel Frame, Like the Modern Railway Bridge

Both the side sills in the John Deere Spreader are of high carbon channel steel with the channels turned to the inside. Into these hollows are fitted four large wooden cross sills. Being bolted, these cross sills can be kept tight, insuring rigidity and alignment of frame at all times.

Built Like a Steel Bridge

Zook the Painter, will hang your paper for you.

You can obtain the Daily Telegram cheap now. Try at the HERALD office.

Ernie Force, who is working in a barber shop at Salem, came home Sunday for a few days visit.

J. W. Leask finished the crossing at Main and Knox streets, Saturday, which very materially benefits pedestrians.

Mr. and Mrs. F. E. Lenhart, who were visiting relatives here for ten days, left for their home at Wendling, Friday morning.

Now is the time to subscribe for the Evening Telegram, at only \$3.50 for a year and those who take the Telegram and HERALD can have both one year for \$4.25. Those now taking the Telegram can have their subscription extended. See the Telegram advertisement elsewhere.

L. Pease and family, who have been residents of Monmouth and vicinity for a year past, left this week for Modesto, California, where they expect to reside in the future. They are in search of a dryer climate on account of throat trouble on the part of Mrs. Pease.

Albany is to have the queerest joint political celebration on record. The democrats celebrate because Wilson was elected president; the republicans because they elected all the county officials but school superintendent, and the anti-saloon league because Albany voted dry.—Jefferson Review.

Brown & Sibley, attorneys and abstracters, 610 Mill Street, Dallas, Oregon.

T. W. Brunk, joint representative of Polk and Lincoln counties, was in Monmouth Wednesday on the occasion of the 90th birthday anniversary of T. O. Waller to whom he is related.

Newspapers report that three car building companies have placed orders for 100,000,000 feet of lumber in the state of Washington, the largest order of this kind ever placed. This is for rush work on the new rolling stock for the railroads. For five years past scarcely any rolling stock has been ordered, but now it is found that a great deal is needed, and the car shops are being rushed to fill the orders. When the lumber business is good in the state of Washington, all lines of business are good as lumbering is still the big industry of this state.—Ex.

Monmouth Heights

W. H. Mack vealed two fine calves Wednesday.

Mr. Clinton and Dave Olin are cutting wood for Dave Dove.

John Holman and family were county seat visitors Wednesday.

Kenneth Huggins spent several days last week at Falls City, visiting relatives and friends.

Roy Johnson is cutting stove wood on the Luckiamute this week.

Miss Minnie Wunder, who is teaching at Oakdale, spent Saturday and Sunday with her parents here, Mr. and Mrs. Herman Wunder.

WASHING WANTED.

Will do washing for families or individuals. First house south of printing office, Monmouth.

MRS. FRED SCOTT.

MRS. ELLA HARRIS IS FIRST WOMAN VOTER

Casts Ballot at City Election in Dayton, Oregon, and Many Follow.

DAYTON, ORE., Nov. 18.—Mrs. Ella Harris, primary teacher in the public schools here, is the first woman in Oregon to vote at a popular election, and between 40 and 50 women of this city are voting today at the city election in progress here since this morning, the first election to be held in the state of Oregon since woman suffrage carried on November 5.

Today's election is for the purpose of electing a Mayor and Councilmen for the government of this city, and the women of Dayton, as soon as the passing of the suffrage amendment was an assured fact, announced their plan to vote at the election. How well they carried out their intention is seen by the fact that, when the polls opened, a number of women of the city were on hand and, after Mrs. Harris had cast her ballot, the women one after the other, entered the booth, and for the first time in the state exercised their right of franchise, cheered by the men of the city, who take kindly to the assistance of the women in government.

FOR SALE

One fine male Berkshire hog, weight 350; one Stover feed grinder, good as new; one Bane wagon 2 1-2, with bed, almost new; one black mare, weight about 1200, sound and true, one Mitchell hack, canopy top, almost new.
