There are none better

The farmer who buys either the **New Deere Gang or Sulky Plow** gets absolutely the finest, most servicable implement of its kind ever produced. Before buying such a tool you'll want to know how it's built, how it works and what it will do for you. As to quality of the material and workmanship the name **Deere** on it is a sufficient guarantee for you on those points. For ease of operation and light draft the **New Deere** will be a happy surprise to you. The many new features which enable the operator to do work with it he never could do before, with a sulky or gang plow, are marvels of simplicity and effectiveness. It takes a whole book and a lot of illustrations to explain them all, and we know you will want to read the book.

Fire In Dallas Tuesday Morning.

At 11:30 this morning the fire company responded to an alarm calling them to the E. W. Minnich home on Uglow avenue, at the extreme southeast limits of the city, reaching the scene too late to be of service, and without enough hose to reach the flames which destroyed the house. The residence was the property of Mrs. S. F. McKinney, whose home on Jefferson street was partially destroyed by fire some time ago. The property is said to have been valued at \$1000, and was covered by half that amount of insurance. The household goods were wholly destroyed. Mr. Minnich is an uncle of Charles Minnich, and is employed in the Electric Socket factory. The origin of the fire is unknown. Mrs. Minnich had stepped from the home but a few minutes before with one of her children, only to return and find the home in flames. She was barely able to save the life of the other child from the flames. The fire started in the kitchen.—Observer.
