well and made it necessary to shut down the plant has been satisfactorily adjusted, and that work will be resumed in a few days.

A new spear has been purchased, one being found at Oregon City that with some alteration will do the necessary lifting of the 6-inch casing that must come up before any further work is done. There is known to be a break in this casing near the bottom, and until that is fixed noth-

ing in the way of drilling can be done. The casing will now be taken up, the break located and repaired, and the casing replaced. Then it will be up to the drill to get busy. There was such an excellent showing of oil when this pipe trouble developed, it is anticipated that it will not be very many feet until the big oil sand is again struck, and the proper reward reaped for all the pioneer work that has been done at this well.—Dallas Itemizer.
