Star Theater Changes Hands

Thomas Strain and son, Walter, have sold their interest in the Star Theater to J. C. O'Rielly of Salem, who takes charge at once.

Mr. O'Rielly is a young man and has a practical knowledge of the show business, as he has had three years experience with moving picture shows which will enable him to give the patrons here the best of service, and to build up a good business.

Mr. Strain and son worked under disadvantage as they had too much other work to attend to and could not give the show business the attention that it required, although they say that they did well enough and have no complaint to make.

Mr. O'Rielly gives his first show tomorrow night.

HOTEL MONMOUTH.

Stellar Distances.

An English writer has amused himself in figuring on the price of a journey to the nearest star. Assuming that it would be possible to travel at a speed of 500 miles an hour and that the fare would be as low as 2 cents a hundred miles, he figures that the traveler would have to pay \$5,500,000 for his ticket and that he would reach his destination in 5,839,440 years. If the traveler, however, could take passage on a ray of light he could make his journey in four and one-quarter years. At that rapid rate he could reach the moon in a second and a quarter, the sun in eight minutes and Neptune in four years.

Overdoing It.

Mr. B., who was dining out, had done lavish justice to the good things before him. By way of a graceful apology he remarked with a beaming smile directed toward his hostess: "I've always heard, ma'am, that the highest compliment one can pay the housekeeper is to eat heartily. You observe that I have been exceedingly polite."

"Thank you, Mr. B.," smiled back the hostess. "Indeed, I think that you have carried politeness to the point of flattery."—New York Evening Post.

An Ancient City.

Rhodes still survives, a medieval city in all its defensive war gear of tower and curtain and keep. It is the city which the Knights of St. John erected in the midst of the Byzantines after they had been driven out of Jerusalem in the early fourteenth century. Probably few travelers realize how well preserved the tremendous fortifications and dwellings are.
