FRIDAY, DEC. 25, 1914.

The HERALD wishes its patrons and readers a Merry Christmas.

This is the season of the year to make good resolutions. But good resolutions avail but little unless they are kept.

The coming week is a good time to take a retrospective glance of the past year and to sum up the successes and the mistakes that have been made, and to profit in both instances so that future success may be greater and the mistakes avoided. Man is largely the arbiter of his own destiny. If he overcomes and pushes ahead he can reach a high goal but if he drifts he will not reach the top round of the ladder of achievement.

### To Doctor Limberger

A Pennsylvania preacher has discovered a way to take the "Lim" out of Limberger cheese.

It is generally conceded that the great objection to this cheese is the pungent odor that emanates from it. To dissipate this the preacher slices off the outside of the blocks. These slices he lays into a saucer and pours hot water over them for a few seconds. When the water is turned off that which shocked the olfactory nerve is gone and what remains of the slice is rendered doubly delicious. When all the outside is thus treated the center of the block does not require the hot water bath.

He advises that the blocks be kept in a wide mouthed glass jar with a close fitting cover to prevent further drying. The method is reminiscent of the best way to cook a carp which involves throwing the carp away after extensive preparations have been made.

At any rate modern invention threatens to eliminate the old joke about Limberger cheese.—Portland Journal.

### Perfecting the Aircraft

The war will make of the aeroplane a commercial success as well as a warlike menace. There was a certain recklessness of consequences dare-devilishness absolutely essential to the perfecting of the air machines. It is true that the makers and operators of these aircraft seemed to be reckless enough. They risked life and limb and many of them paid the penalty. But the incentive as well as the overshadowing need of the invention was to a large degree lacking until the necessities of war drew them forth. It is doubtless true that the last four months have done more to make the machine practically available than might have been done otherwise in five years. Whilst the machines fell short of what active imagi-

nations pictured for them and whilst they may till the end of the war fall short of the extraordinary standards set for them, nevertheless every day's experience is showing that they are even now a factor to be reckoned with whilst giving promise of very much greater things.

A little while ago the world would have been thrilled with any air flight. Bleriot's trip across the channel from France to England created a worldwide sensation. There is never a day now when that flight is not surpassed, not only in its extent, but in the quality of the performance. Besides the ordinary dangers that confront the airman in the safe management of his craft there is the enormously added danger from the specially constructed guns that are intended for his undoing in the enemy's country. Furthermore, the element of weather conditions in the very necessities of the case is now given very little attention. All of these things are breeding up a race of masters of the air who will eventually make of the upper realms as safe a way of travel as any that mortals now enjoy.—Telegram.

### Wood Flour From Sawdust Waste

In its efforts to attain complete utilization of our forest resources the federal government has been making inquiries into the possibilities of manufacturing wood flour from sawdust waste.

The flour in question is not the kind which is converted into fluffy biscuits or flaky pastry, nor is it a substitute for corn meal, although it looks somewhat like it. This wood flour is made by grinding dry sawdust or small wood waste (that of pine or spruce is excellent for the purpose) in a cheap mill, similar to the kind in which corn and rye are ground. After passing through the stones and the bolting chest, it is sacked or baled for shipment. It is then worth \$12 to \$13 per ton.

This flour is used in making dynamite, and acts as the absorbent for the nitro-glycerine. Dynamite made with wood flour as one of its ingredients is somewhat inferior to that made with infusorial earth, but it is cheaper. The use of wood flour in the manufacture of dynamite, however, is but a minor use of the product. Its chief use is in the manufacture of linoleum and xylolite, both floor coverings that are very popular for use in kitchens, halls, corridors, cafes, restaurants, and public rooms. It is impervious to water and practically fire proof. It is also used as floor material on some of the German war vessels, for it is not liable to take fire or splinter if hit by shells.

The manufacture of wood flour is already an extensive industry in Europe. Norway has been manufacturing it for years, and exports thousands of tons. Germany also is a large manufacturer. England and France are extensive buyers. In the United States the matter of wood flour has not as yet been given much consideration. A few mills in the Middle West and one at Hoquiam, Washington, are all that have attempted to transfer their wood waste into wood flour. The amount of sawdust to be had in this country, especially in the Northwest, is unlimited, and lumbermen should welcome this method of turning

their waste into a practical and profitable product.

Save your combings and let Blanche C. Stitt weave you a switch. Phone 3905 or call first door north of HERALD office.

FARMERS WEEK—FEBRUARY 1-6

A general clearing house session of six days for the exchange of dynamic ideas on the most pressing problems of the times. Lectures by leading authorities. State conferences.

### EXTENSION SERVICE

Offers lectures, movable schools, institutes and numerous correspondence courses on request.

MUSIC: Piano, String, Band, Voice.

No tuition. Reduced rates on all railroads. For further information address, The Oregon Agricultural College, (tw-12-1 to 1-1) CORYVALLIS, OREGON

### Ordinance No. 178

An ordinance to prohibit within the corporate limits of the City of Monmouth, Oregon, the use of fire-crackers, torpedoes, rockets and all kinds of fire works and explosives, the firing of guns, pistols, or any kind of fire arms or the use of any device wherein powder or any kind of explosive is used, the use of air guns, bean shooters or sling-shots, and providing a penalty for violations of any of the terms of this ordinance, and repealing all ordinances and parts of ordinances insofar as they conflict with the provisions of this ordinance.

#### The City of Monmouth Does Ordain:

Section 1. No person or persons shall set fire to or explode any fire cracker, torpedo or rocket, shoot off any gun, pistol or other fire arms or device wherein powder or any other kind of explosive is used, neither shall it be lawful to shoot air guns, nor bean shooters, or use sling shots within the corporate limits of the City of Monmouth, Oregon, except as hereafter provided: That this ordinance shall not apply to the use of guns in the destruction of moles and gophers and vicious or destructive animals, nor to farmers in the slaughter of beeves and hogs, nor to shooting galleries.

Section 2. That any person or persons violating any of the provisions of section one of this ordinance, shall, upon conviction thereof before the City Recorder of Monmouth, Oregon, be punished by a fine not exceeding \$25.00 and costs of prosecution, and if such fine be not paid, then by imprisonment in the City jail not to exceed 12 days.

Section 3. That all ordinances and parts of ordinances, insofar as they conflict with the provisions of this ordinance, be and the same are hereby repealed.

Passed by the Common Council the 22nd day of December, 1914.

Approved by me this 22nd day of December, 1914.

P. H. JOHNSON,  
Mayor.

ATTEST:  
D. E. STITT,  
City Recorder.

### Ordinance No. 179

An Ordinance to repeal Ordinance, No. 176, "An Ordinance amending portions of Section, 33, of Ordinance, No. 168," an Ordinance creating the office of Water Board, providing for the time and manner of election and appointment of the officers thereof, and for the appointment of subordinate officers under them, and their duties. Rates for water, rules and regulations for general management of the water system, "and the amendment of Section 33, of Ordinance, No. 168." An ordinance creating the office of Water Board, providing for the time and manner of election and appointment of the officers thereof, and for the appointment of subordinate officers under them, and their duties. Rates for water, rules and regulations for general management of the water system,"

100 feet or fraction thereof, to curb,

including space occupied by the build-

ings, with nozzle 3-16 inch or less, \$1.00

Lawns larger than 50 by 100 feet,

charges to be in proportion.

Schools of 250 pupils or less - \$8.00

For each additional 100 pupils or

major fraction thereof - .50

Garages - - - - - 1.50

Stores with Soda fountain - 1.00

Meat Market - - - - - 1.00

Bakery - - - - - 1.00

Private toilet, not in connection

with residence - - - .50

Meter Rates—A minimum charge of

\$1.00, with an allowance of 2,000 gal-

lons of water, and all above that amount

shall be charged as follows:

The first 1,000 gallons, at 50 cents

per 1,000 gallons.

The next 10,000 gallons, at 25 cents

for each 1,000 gallons.

The next 50,000 gallons, at 20 cents

for each 1,000 gallons.

For all above 60,000 gallons a charge

of 15 cents per each thousand gallons

will be made, and fractional thousands

will be charged proportionally in the

schedule in which they occur.

Section 3. That all ordinances and

parts of ordinances insofar as the same

conflict with the provisions of this ordi-

nance, be and the same are hereby re-

pealed.

Section 4. This ordinance shall be in

full force and effect from and after its

approval by the mayor of the City of

Monmouth, Oregon.

Passed by the Common Council the

22nd day of December, 1914.

Approved by me this 22nd day of De-

ember, 1914.

P. H. JOHNSON,  
Mayor.

ATTEST:  
D. E. STITT,  
City Recorder.
