

HOW DID YOU DIE?

BY EDMOND VANCE COOK IN ZION'S ENSIGN.

Did you tackle the trouble that came your way
 With a resolute heart and cheerful?
 Or hid your face from the light of day
 With a craven soul and fearful?
 Oh, trouble's a ton, or trouble's an ounce,
 Or a trouble's what you make it.
 And it isn't the fact that you're hurt
 That counts,
 But only how did you take it?
 You're beaten to earth? Well, well,
 What's that?
 Come up with a smiling face,
 It's nothing against you to fall flat,
 But to lie there, that's disgrace.
 The harder you're thrown, why, the
 Higher you bounce;
 Be proud of your blackened eye!
 It isn't the fact that you're licked that
 Counts;
 It's how did you fight—and why?
 And though you be done to the death,
 What then?
 If you battled the best that you could;
 If you played your part in the world of
 Men,
 Why, the Critic will call it good.
 Death comes with a crawl, or comes
 With a pounce,
 And whether he's slow or spry,
 It isn't the fact that you're dead that
 Counts,
 But only how did you die.

Cooperation In Fire Prevention Work Urged

According to official reports, there has been an unusual amount of damage done in the eastern states this spring on account of forest fires. As a result, the Government is emphasizing its campaign, having for its main object the cooperation of the general public in the work of fire prevention and suppression. In this work the west has already been very active, for fire prevention west of the Rocky Mountains has reached a well established basis.

For the past five years, the Northwest has carried on a live campaign of publicity, setting forth the results of forest fires and urging the help of the community in suppressing and preventing them. Various kinds of notices have been freely posted, and circulars have been distributed among young and old everywhere. The campaign has been so effective that the public has awakened to its duty and interest in the matter, with the result that where the Forest Service once stood alone in fire prevention work, it now has the cooperation of the States, of private organizations, timber owners, and the public general-

ly. Every camper that enters the woods knows that he must not throw away a match until he is sure it is out; he will not drop a burning cigarette or cigar butt; he will not knock out his pipe ashes while hot, or where they will fall into dry leaves or other inflammable material; he will not build a camp fire any larger than absolutely necessary, nor will he build it against a tree, a log, a stump, or anywhere but on bare soil; he will not leave his fire until he is sure it is out; he will not burn brush or refuse in or near the woods if there is any chance that the fire may spread beyond control or when the wind may carry sparks where they would start a fire; if he discovers a fire in the woods and can't put it out himself, he will notify the nearest forest guard, ranger, or State fire warden.

In fact, he will be just as careful regarding fire in the woods as he is with fire in his own home. He will not only do all these things himself, but he is so well convinced of the wisdom of fire prevention measures, that he will urge it upon his friends and neighbors and thus help the good work along.
