### A COMPLAINT

This town is going to the dogs—  
I always said it would;  
The people don't turn in and help  
A neighbor like they should.  
I've always thought we all should aid  
A fellow in his fights,  
And, when he gets the worst of it,  
Should help him get his rights.  
But do the people do like that  
In this community?  
When I have trouble like I have,  
Do they come helping me?  
For instance, with the railroad I  
Have got some trouble now;  
Have people helped me as they should  
To fix that little row?  
You see I bought some shingles from  
Chicago, where they're cheap;  
I saved a dollar on the lot,  
For here they're pretty steep.  
I needed them, and right away,  
The rainy days were near;  
The railroad took a month at least  
To get the shingles here.  
And, when I got them, half a bunch  
Was missing from the lot;  
I guess it was the better half—  
The poorest ones I got.  
The freight bill was another fright—  
They overcharged me, too;  
And I won't pay it, not a cent—  
I won't be robbed. Would you?  
But I can't get the shingles now,  
Nor get my money back.  
The railroad will not give them up—  
It's raining in the shack.  
The merchants they won't do a thing—  
I think it is a crime;  
They ought to rise and make a kick  
And bring that road to time!

### DEVELOPMENT KEYNOTES

**ENTERPRISE** in discovering the resources and possibilities of the community.

**INITIATIVE** in planning and organizing movements for local development.

**ENERGY** in pursuing a sound policy once established and supporting a campaign deliberately undertaken.

**PATIENCE** in working for harmony among conflicting forces and opposing interests.

**INDUSTRY** in securing financial aid, moral support, and substantial cooperation in worthy community organizations.

**FORESIGHT** to see ultimate benefits to all that inevitably result from unified effort for the common welfare.

**CONFIDENCE** sufficient to meet all discouragement, to surmount all obstacles and abide to the end.

### THE MODEL HOUSE

will not stay model long if inferior, unseasoned lumber has been used in its construction. It will retain its beauty and serviceability for untold years if built with such lumber as we furnish. Isn't it better to build so that you'll have a house that will last for years without repairs rather than one that keeps on costing all the time?
