

GRAIN HARVEST EQUIPMENT

"PLYMOUTH" Saves Your Time and Money

Bothersome knots, frequent breaks and snarls — these come from using cheap twine. They cause delays and break-downs that amount to many times the cost of the twine. You can avoid this extra cost by using PLYMOUTH. No getting down from your seat to loosen snarled places; no stopping to thread up; no loose sheaves to re-bind and no lost grain.

PLYMOUTH BINDER TWINE

always satisfies. Wheat growers say, "PLYMOUTH is the most even twine ever made." Any man who uses PLYMOUTH will tell you it has the fewest knots and causes the least trouble. Works perfectly on both old and new binders. Saves many times its own cost. Goes farthest. Always marked with the sheaf-of-wheat tag, which guarantees a smooth-running, strong, full length twine. Call and let us tell you more about PLYMOUTH. Ask for free booklet on twine.

John Deere Binder

John Deere implements are the best to be had. No untried mechanical construction has been embodied in the John Deere binder.

When you compare the John Deere with others you will readily see that it is the most durable, strongest grain binder on the market and that the substantial construction is applied throughout the entire machine.

U. of O. Notes

University of Oregon, Eugene, July 12. — (Special.) — P. Burton Arant, of Monmouth, is one of the students registered for the summer session of the University of Oregon. Other students from Polk county are Hazel Knight of Dallas, J. C. Bell of Rickreall and J. W. Noblet of Airlie.

The University Summer School this year shows an increase in attendance of more than 66 per cent over last year, and more than 100 per cent over the year before, constituting one of the most rapid gains in size in such a short period ever made by an old established institution in the state. The Summer School has been in existence eleven years, but its great spurt in growth dates, like that of other departments of the University, from the time of the withdrawal of the Oregon educational institutions from the field of politics, and from the establishment of a high standard of graduate work in all the summer courses.

The summer students are said to average more than 30 years of age, many of them being successful men and women in many lines of work.

Numerous married couples are registered this year, husbands and wives taking work together. The overwhelming majority of the students are Oregonians, but the following states are represented: Washington, California, Idaho, Montana, Iowa, Kentucky, Arizona, Kansas, and the province of New Brunswick. The most distant student comes from Amoy, South China.
