Local Brevities

Dean Butler of Orgeon City was a Sunday visitor at the home of his parents, Mr. and Mrs. Orville Butler.

C. E. Force has a vacation from duties at the Normal this week and is spending the time along with his better half, visiting with relatives in Portland.

Miss Hoham, writing from her home in Indiana, states that her mother is slowly improving.

Rev. Conklin was a visitor in Portland during the early part of the week.

Miss Gladys Denney has engaged to teach school next year at Powers, in Coos county.

L. J. Simpson, democratic candidate for county commissioner, was a visitor in Monmouth Monday.

Maxwell Bowersox who is working in the shipyards of Portland was a visitor with the home folks Sunday.

Let Manley M. Arant do your photo finishing. Work guaranteed.

Daniel Boone Howell brought an automobile load of folks down from Portland Sunday to show them the sights of the valley and stopped for chicken dinner with his parents, Mr. and Mrs. John Howell.

Mr. and Mrs. C. G. Griffa are back from a week's visit with relatives in Jefferson.

Two furnished houses to rent. One 6 room; one 4 room with bath. See A. B. Morlan. 4tx

P. O. Burbank and wife were visitors in Portland Sunday.

Mrs. Hugh Guthrie and daughters, Doris and Eleanor, came Saturday for a visit with Mr. and Mrs. H. E. Guthrie. Hugh came down from Corvallis Sunday morning returning in the evening. He has a position with the S. P. Company, checking logs and book keeping in the freight depot.

Mr. and Mrs. W. J. Miller left Wednesday morning for Roseburg where they expect to spend the coming few weeks. Mr. Miller will help Samuel Strickler to harvest his 30 acres of prunes and will have charge of the dryer. Mr. Strickler also has a number of acres of pears.

A. Brown has vacated the Waller house and moved back to Rickreall.

The Adams outfit is at work this week baling straw for Fred Smith.

J. M. McDonald and family are off for a visit to Newport, making the cross country trip in their Ford. They started Wednesday and expect to be gone two weeks.

Dr. R. C. Virgil, Osteopathic Physician is in Monmouth Tuesday and Friday afternoons weekly. Please make appointments with Dr. Butler.

It had been planned to have no services in the Christian church for the next two Sundays, but because of the funeral of A. E. Young, services next Sunday will be held as usual, morning and evening.

GINGER BREAD, always liked, and inexpensive: One cup cornmeal; one cup wheat flour; two teaspoons cinnamon; two teaspoons ginger; one-half teaspoon salt; one teaspoon baking-powder; one teaspoon baking-soda; one cup molasses; one cup sour or buttermilk; two tablespoons fat.

Sift the dry ingredients and add molasses, milk and fat. Beat well and pour into greased pan. Bake twenty-five minutes. Note that this recipe uses cornmeal for half the wheat flour ordinarily used.

Monmouth Heights

Allen Towns of Bowersville was here at his farm on business Wednesday.

George Heck finished threshing in this vicinity Friday and is now threshing in Cooper Hollow.

Mrs. E. Clark of Monmouth was a guest of her daughter Mrs. Retta Hamar last Sunday.

W. M. and C. C. Fishback of Portland were over Sunday visitors at their home place.

Misses Ruby Galloway and Amanda Hartrany of Hillsboro were Saturday and Sunday visitors at the Fishback home.

George Sullivan of Monmouth was seen in our midst the first of the week.

J. H. Mulkey and son-in-law Ray Adams of Monmouth were here on business the first of the week.

Clothes Economy

You can best economize on clothes by purchasing good clothes.

You need not buy often, if you choose wisely.

Born tailoring offers the greatest measure of clothes value in exchange for each dollar invested.

Born tailoring offers you true clothes economy.

Every Man a Goat Owner

With the department of agriculture trying to foster backyard gardening and backyard poultry raising it would not be surprising if it did not come out in favor of backyard goat raising, except for the fact that the ordinary city yard is not quite large enough in which to keep a goat.

Over in Europe milk goats are largely used by families unable to keep a cow. In Switzerland, according to F. S. Peer, a well-known American importer of live stock, the goat is the Swiss peasant's cow and Swiss baby's foster mother, a blessing to the sanitariums for invalids and a godsend to the poor.

In England and in many other parts of Europe people who leave the cities during the summer months, either for their country homes or for travel, often take a milk goat with them, so that the infant or other members of the family may have a good supply of milk of uniform quality. Similar instances have been recorded in this country. No other animal is so well adapted for such a purpose, and there is probably no other country where goats are so much needed for such a purpose as in the United States.

The industry in the past, says Edward L. Shaw, a specialist of the department of agriculture, has been greatly handicapped, owing to the scarcity of good goats for foundation herds. Only a few goats have been imported, and importations can not be made at present time from most of the countries where desirable goats are produced. But the goats that have been imported have been widely distributed and most of them seem to have done well under their new environment.

The milk goat is adapted to this country, and the industry is likely to become of greater importance every year. The goat is especially useful to those who desire to small quantity of milk and do not have the room, or can not afford a cow, and it will consume considerable

feed that otherwise would be wasted. The fact that goats are rarely affected with tuberculosis is another point in their favor. The demand for good goats appears to be far greater than the supply.

About the first question that most people ask concerning goats is, "How much milk will they produce?" This is of course, a very important consideration, as the value of a doe is estimated largely by her milk production. Even if a doe is pure bred she is of little value from the utility standpoint unless she is capable of giving a good quantity of milk. Many persons in purchasing pure-bred or even grade goats have been disappointed to find that the milk could be measured in pints and not quarts or gallons as expected.

A doe that produces three pints a day is considered only a fair milk-er, while the production of two quarts is good and the production of three quarts is considered excellent, provided the lactation is maintained from seven to nine months. There is probably no better way to treat this matter than to state that good does should produce from eight to fifteen times their weight in milk in a lactation period.

It is stated by German writers that many goats yield ten times their body weight in milk annually, and exceptional animals as much as eighteen times their weight.

The price to be obtained for goat's milk depends upon a number of conditions. In the past the price

has ranged from 10 to 50 cents a quart, and the highest prices have been obtained when the milk has been supplied for the use of infants and invalids.

Owing to the excellent demand and limited supply of milk goats, breeders are naturally asking good prices for stock. Pure-bred bucks of any of the leading breeds cost from \$25 to \$100, depending of course, upon breed, age, conformation and breeding. The price for does range from \$25 to \$150 for pure-breds while grade or cross-breds range from \$5 to \$50. Persons who wish to procure a milking doe to furnish milk for an infant or invalid are only too glad, as a rule, to pay a fair price, and do not care so much about the breeding of the goat. It is largely milk production in the doe that establishes her value. In some herds, where breeders do not care to raise all the kids and desire to dispose of them as soon as possible after birth, the price ranges from a few dollars up to \$10 a head.—Oregon Farmer.
