What were the fish swimming between the floating dock and the shore? Carp. There were millions of them in the river and they were spoiling the river for the native fish. They ate the wapoates and there was nothing for the other fish to feed on. Yes, they caught lots of the carp and shipped them to New York city where the Jews eat them. Chinamen had to be very hungry to eat carp. And they like fish too.

Fresh water black bass had also been surreptitiously planted in the river and they had multiplied and were devouring small salmon by the million. BE PREPARED FOR THE CHILDREN

Children are born without shoes, but with a genius for wearing them out. So the hardest thing to find is a shoe that will with-stand the wear and tear that the healthy youngster gives. Good shoes for them must have about the best balance of good leather and good shoe making that can be averaged in any line of shoes.

Our shoes are made of solid leather and moulded to give the feet plenty of room for comfort and growth.

Come in and let us show you the difference in children's shoes.
