The Dependable Tractor That Burns Kerosene Perfectly

The 12-25 H. P. Waterloo Boy Tractor is just the kind of machine that we like to put into the hands of our customers.

There is nothing experimental about it. Its dependability has been fully proved in years of service on the farm. Every time we sell one, we feel the assurance that the owner is going to get fully satisfactory service from it. And that means a great deal to the future of our business.

Right along with its dependability for long-continued good work, there is another big feature that you will appreciate every day you use the Waterloo Boy.

It burns kerosene perfectly. Its patented kerosene manifold—one that you can get on no other tractor—converts all of the low-priced fuel into a pure gas, enabling the motor to get full power from every drop.

That saves motor trouble—no kerosene gets into the lubricating oil. There is no carbonizing of cylinders or fouling of spark plugs.

And it saves many dollars in fuel cost every year of its operation.

You are sure to like all of the Waterloo Boy's other features. It is simply made; easy to keep in good running order. The working parts, fully protected from dust, are placed where you can easily get at them, whenever necessary, through inspection plates and detachable casings. The motor, perfectly balanced and mounted on a solid foundation, runs with only slight vibration—no racking of mechanism. Gears are steel-cut and case-hardened—practically everlasting. It is equipped with Hyatt Roller Bearings, famous throughout the world for conserving full power. All bearing points and gears are kept constantly in a bath of oil by the perfect system of lubrication.

Be sure to come in some day soon and get fully acquainted with the Waterloo Boy.
