

# THE VIRGINIANS TO BE HERE

Jubilee Company Coming to Chautauqua

Have you ever stopped to realize that the only thing approaching Folk Songs we Americans have is the genuine colored Jubilee song? Unlike the older countries of Europe, where the Folk Songs have been developed in the past, we in America have no such music because we are mixtures of too many races. Only the Negro has developed in our national life. Each of his songs tells its own story of heart throbs and Heaven with its joyous songs like "Swing Low Sweet Chariot"—"The Lord Laid His Hand on Me" and a multitude of others, just as simple and full of the kindly, childlike faith and hope of the race.

A real Jubilee shouting time is a sure cure for the blues, and we have brought the Virginians to sing out the jubilee songs. What is more fitting than that it should close to the stirring notes of these deeply religious, yet happy, camp meeting and plantation melodies.

The Virginians are one of the best Jubilee companies on the Chautauqua platform; and they have sung together for years. They have a repertoire that includes all the old and many of the new pieces. Don't miss their two concerts on closing day.

## CAMBER SEEKS TO INCREASE POPULATION OF FARMS IN 3 YEARS

The water resources to irrigate 1,000,000 acres of land now under the plow, and which would support 200,000 new population, or 400,000 new families.

The Oregon State Chamber of Commerce can bring 1,000 families to utilize this land and water. It will mean in expenditures alone for such commodities as clothing, food, furniture, etc., of \$1,000,000, calculating the expenditures for an entire family at only \$1000 per year, to say nothing of the wealth produced by these new settlers.

The term "gas" was first used in chemistry in the sixteenth century. The color yellow is said to have a very beneficial effect on the health. Farmers' wives in Japan rear silk worms, just as our country women keep poultry. The queen of Norway keeps a scrapbook of all newspaper cuttings concerning herself.

## DEMOCRATIC CONTROL FOR STATE CHAMBER

Subscribers to Budget Will Have Voice in Matter of Expenditures.

"After I have subscribed to the Oregon State Chamber of Commerce, what part will I have in the organization?" This question is frequently heard in connection with the State Chamber expansion movement now in progress. The answer is that all subscribers will have a voice in saying how the money will be spent. By this and other methods the fundamental democracy of the organization is assured. Of course the Board of Directors,—to which every member is eligible,—will actually expend the funds of the organization; but they will be guided in their expenditures by the wishes of the subscribers.

To determine what the subscribers want the State Chamber to do, group meetings will be held in every center of population in the state, when all subscribers will be called together and asked to answer, in writing, the following questions:

1. What can the Oregon State Chamber of Commerce do to improve conditions of opportunities in your own line of business or profession?
2. What do you believe the Oregon State Chamber of Commerce should do to advance the interests of your own community?
3. What in your opinion as a citizen, is the thing of first importance for the Oregon State Chamber of Commerce to do for the good of the state as a whole?

After these group meetings have been held under the direction of the executive committee in charge of the campaign, each district will select one representative to attend a convention with the officers and directors of the State Chamber, and the answers to the questions will be formulated into a program of activities designed to unite the entire state on definite tasks.

The program of work will also control expenditures. When work is started on this program the directors will follow their present practice of submitting questions of wide importance by means of referendum.

The Directors represent every city and county in the state. Representation on the Board is arranged geographically and not based on population. Eastern Oregon is represented by five Directors, Western Oregon by five, Multnomah County by two, and there are three at large; making a total of fifteen, which avoids the possibility of control by any one section.

To sum up: The State Chamber will do what the subscribers themselves say should be done. It will function through a Board of Directors elected by delegates and officers, including an executive secretary, elected by the Board. Voting will be done by constituent members. Individual subscribers help make up the program of activities and carry them to completion through committee service.

## "Even a professor can learn"

THE PROFESSOR dropped in. I FELL for it, and gee.

LAST NIGHT and said. I'M JAKE for keeps.

HE HAD a puzzle. AND SITTING on the world."

YOU KNOW he speaks. AND THE second one said,

FIFTY SEVEN kinds. "JUST SLIP us one.

OF HIGHBROW talk. FOR THE double-O."

BUT HE'D just heard. AND THAT was all.

TWO FELLOWS talking. I LAUGHED and pointed.

SOMETHING LIKE this. OUT THE window.

"HERE'S THE real cheese. AND THE prof read.

ON THE kind of butt. THE ELECTRIC sign.

FOR STEADY stuff." AND HE was on.

"SPILL IT," said the other. THE SIGN just said.

SO THE first one said. "THEY SATISFY."

"IT'S GOT the goods.

AND PEP and all.

JUST TOUCH one off.

AND YOU'LL be living.

THE LIFE of death.

THERE may be a hundred other ways to say it, but in good plain United States, it's "they satisfy." Those fine Turkish and Domestic tobaccos and that can't-be-copied Chesterfield blend put Chesterfields where none can touch them for quality and value.

## HALF-POUND BABY WILL LIVE STEWART LC

Weights Nineteen Ounces Now—To Be World's Most Beautiful Baby, Claim.

New York.—Jeanne Ousset, champion New York lightweight baby, is "perfectly healthy and will be the most beautiful baby in the world," despite the fact that, when born, she weighed only half a pound.

Jeanne, who is the daughter of Mr. and Mrs. Louis Ousset, of 229 East Thirty-fifth street, is now six weeks old and weighs one pound and three ounces.

"When she was born all the doctors said that she could not possibly live," said Miss Louise Benard, the nurse. "But she is fooling them all. Her health is perfect and her daily development is a thing beautiful to see. She will not remain small."

Both Mrs. Ousset and Miss Benard are in constant attendance to the tiny mite of humanity, whose weight is just equal to that of the doll with which she is amused.

Stewart Long—Lecturer—Soldier—Preacher. Stewart Long "spent the summer in France" last year, and it has been the rounding out of a superb character. He went through the Argonne drive, and after hostilities ceased he was sent on a speaking trip throughout the entire 89th Division, giving his splendid lecture, "Reaching the Goal." Later he was instructed by the commanding officer to repeat the trip, lecturing upon military questions.

Lieutenant Long's addresses are the kind that grip a fellow when he feels things slipping, the kind that strengthens for the daily grind and steadies a chap when everything seems wrong. Long is one of the worth-while MEN of the Chautauqua platform. He speaks twice on the 4th day of Chautauqua.

## LIVED ON HARDWARE DIET

Shellshock Victim Found to Have 668 Pieces of Foreign Substance in His Stomach.

Danville, N. Y.—That a shellshock patient in the United States hospital here, in fits of delirium swallowed a varied hardware diet almost beyond credulity, was revealed by an operation on the man's stomach.

When Doctor Driesbach, the head surgeon, opened up the patient's stomach he found 30 rolls of tin the size of a man's little finger, four tooth-brush handles, four wooden tongue depressors, several nails, many buttons, buckles, needles and sticks. In all, there were 668 pieces of foreign substances.

## WORLD'S POOREST CITY IS MADE RICHEST BY TOURIST TRAVEL

From the poorest republic in the world to the richest is what tourists travel did for Switzerland. That little republic practically unknown a century ago is now recognized the world over as a playground for tourists because its scenic beauties were capitalized.

Data showing what the tourist business has done for Switzerland has been prepared by Alfred A. Aya representing the Swift interests in Oregon and turned over to the Oregon State Chamber of Commerce to be used in connection with its state-wide expansion campaign now in progress.

It has a direct bearing on the campaign by reason of the fact that one of the chief arguments being used by the State Chamber is that cities are spending huge sums to advertise their interests along civic industrial lines.

In the article prepared by Mr. Aya showing the economic value of tourist travel he says:

"It is estimated that tourists annually spend more than \$750,000,000 in the United States. Of this sum it is estimated Maine and Colorado receive close to \$50,000,000; the New England states close to \$100,000,000; Florida close to \$200,000,000 and southern California close to \$300,000,000—while in 1918 it was estimated that Oregon with scenery second to none in the world received less than \$5,000,000 from this source.

"The best example in the world of the possibilities of the tourist business is Switzerland, with an area of 15,965 square miles, or about one-third larger than Harney county in eastern Oregon.

"The Swiss did not consciously begin development of the tourist business until about 100 years ago, starting with the single guest in the spare room until today the little republic has, according to the latest hotel guide, 959 hotels and doubles its population annually through the tourists. It is said the little village of St. Moritz has few over fifty native population, but 2700 beds for tourists."

Specific cities cited by the State Chamber that are spending huge sums San Francisco which is now raising a fund of \$250,000; Seattle now engaged in raising \$250,000 and New Orleans which put \$100,000 into an advertising campaign.

## It's the Fixtures that Make the Silo

## Compare Our Fixtures with Others

There's a big difference in the "fixtures" you get at the prices asked for different silos.

Compare fixtures when you buy a silo. It is the fixtures that make a silo. Durability, security and stability are determined by the anchorage, the size, quality and number of cables, hoops, lugs and staples. Convenience and ease of getting at your silage for use are determined by the door and ladder construction.

Many silos are priced without hinged doors or ladders.

In other words, you pay as "extras" for necessary conveniences without which your silo is incomplete. Notwithstanding our lower price, we include more and better fixtures than many who ask more for their silos. In some cases we supply more of a given item than others, as in anchorage cable. In others, our fixtures are stronger or better in whatever vital point determines their value. Keep this ad and check our fixtures as described above, with those offered by other silos. Don't pay more and get less, or buy half a silo when you can get a complete one.
