Makes door twice as easy to handle as hinged door. Doors never have to be lifted around, never get lost, are always in place.

### Compare Our Fixtures with Others

There's a big difference in the "fixtures" you get at the prices asked for different silos.

Compare fixtures when you buy a silo. It is the fixtures that make a silo. Durability, security and stability are determined by the anchorage, the size, quality and number of cables, hoops, lugs and staples. Convenience and ease of getting at your silage for use are determined by the door and ladder construction.

Many silos are priced without hinged doors or ladders.

In other words, you pay as "extras" for necessary conveniences without which your silo is incomplete. Notwithstanding our lower price, we include more and better fixtures than many who ask more for their silos. In some cases we supply more of a given item than others, as in anchorage cable. In others, our fixtures are stronger or better in whatever vital point determines their value.

Keep this ad and check our fixtures as described above, with those offered by other silos. Don't pay more and get less, or buy half a silo when you can get a complete one.
