Cotton—Droughts in Egypt, especially foreign aid, pay very little use large-scale production and the extent of which, of course, that the beside the Egyptian market, which is now accounts for only about 10 per cent of the total production. The chief cause for business worry is the sharp drop in cotton prices vis-à-vis the American market. Cotton prices have fallen to a point where it is not profitable for many farmers to continue farming cotton. This is a serious blow to the American cotton industry as it is the mainstay of the southern economy.

Business men in Egypt reported that the cotton market is expected to bounce back in the near future. They noted that the current low prices are largely due to speculation and that the true value of cotton is still high. They also pointed out that the American government has been taking steps to stabilize the cotton market, and that these measures are expected to be effective in the long run.

The chief cause for business worry is the political situation. They noted that the current turmoil is likely to discourage foreign investment in Egypt. They also pointed out that the current political instability is likely to affect the future of the country and the region as a whole.
