POULTRY
DUCK RAISING IS PROFITABLE
Pekins Are Most Popular Breed for Production of Meat and Runners for Eggs.

(Prepared by the United States Department of Agriculture)
Although ducks do not appear to be as well adapted as chickens as a source of income to average farm conditions, yet many farmers are finding duck raising profitable as a side issue to their other farm operations. The demand for table ducks in the cities seems to be on the increase.

The period of incubation for ducks' eggs is 28 days, except for the Muscovy duck, which is 33 to 35 days. The eggs may be hatched either naturally by hens or ducks or artificially in incubators. Strong, fertile eggs are a prime essential to good hatching and are obtained only from stock properly mated and kept under the best possible conditions to secure health and vigor. Eggs from overfat breeding stock do not usually produce a large percentage of strong ducklings. Pekin and Indian Runner ducks rarely sit; consequently, if natural methods of incubation are to be used the eggs are usually hatched under hens. Duck eggs should be washed if dirty, for it does not appear to injure their hatching qualities.

Before setting a hen dust her thoroughly with insect powder. In applying this powder hold the hen by the feet, with her head hanging down, and work it thoroughly into the feathers, giving special attention around the vent and under the wings. Sitting hens should be fed whole or cracked grains, such as corn or wheat. Place 9 to 11 ducks' eggs under a hen, depending on her size and the season of the year, using the smaller number of eggs in cold weather and the larger number in warm weather. Confine the hens at hatching time and do not disturb them until they become restless, when it may be best to remove the ducklings that hatched first.

Hens must be well cared for in hatching ducks' eggs, as the period of incubation is a week longer than that of hens' eggs. It usually takes duck-

lings from 24 to 48 hours to hatch after they pick the shells; therefore it is advisable to allow the hen to get off the nest for feed and water when the first ducklings pick the shell and then confine her to the nest until the hatching is over. Ducks' eggs need more moisture than hens' eggs at hatching time, as it takes the shells much longer to get out of the duck. Poultry specialists in the United States Department of Agriculture advise, therefore, that the eggs should be sprinkled liberally with warm water previous to hatching.

All duck eggs should be tested at least twice during incubation, preferably on the seventh and fourteenth days, and the infertile eggs and those with dead germs removed. Dead germs in duck eggs decompose very rapidly and are often detected by their odor and should be removed from the incubator.

Duck eggs having pure white shells can be tested as early as the fourth or fifth day and the infertile eggs sold to bakers for use in the kitchen. Ducks are much easier to brood artificially than chickens, but they may also be raised under hens successfully. If raised by the latter method, it is advisable to confine the hens and allow the ducklings free range, as the hens are apt to wander too far away with their broods. Ducklings which are to be sold as green ducks are not usually allowed much range, but are fed heavily and forced for rapid growth. The ducklings which are to be kept for breeding should have the web of their feet punched, using a different number of punch marks for each year so that their age can be readily determined.

ferret out the communist refugees and take them back within the jurisdiction of Italy.

Woman Kills Huge Snake.
Fredericksburg, Va.—Mrs. Henry Thomas of this city went to her front door and as she stepped on the porch saw a blacksnake which had crawled up on the porch and was enjoying the sunshine. She got a shovel and cut off the snake's head. The reptile measured 6 1/4 feet. Many neighbors gathered to see the dead snake.

SCHOOL DAYS

Something to Think About
By F. A. WALKER
IN YOUR HOUSE.

IF YOU are not a careful reader of the Bible you may have the idea that all the miracles which it details are in the New Testament, but if you will turn to the fourth chapter of II Kings you may read an entertaining story of one of the remarkable things performed by Elisha in the multiplication of the pot of oil.

Elisha performed many miracles, but of them all this one is perhaps the most interesting. A widow, one of the wives of the sons of the prophets, tells Elisha that her creditors have come to take her two sons as bondmen in settlement of what she owes. Elisha asks her what she has in the house which might be available to settle the debt. Her reply is that her only possession is a pot of oil. At his direction the woman sends her sons to gather all the empty receptacles in the neighborhood and when they have been brought she obeys the command of Elisha that she shall pour from the pot of oil into the empty vessels and this she continues to do until all are filled and then she sells enough of the store of oil to pay her debts and there is sufficient left to supply her and her sons.

What have YOU in YOUR house? The trouble with most of us is that we never value very highly the possibilities of what we have.

The apple on the high branch always looks bigger and fairer to us than the one in our hand. The job that the other fellow has always seems easier and more satisfactory than our employment.

The other man's lot always seems pleasanter than ours and his prospects and chances brighter and more attractive.

The trouble is we do not properly examine and truly estimate and wisely use what we have "in OUR house."

Success is made up entirely of what we have and how we use it. No man was ever born who did not have the possibility of success.

No man ever lived who did not have plenty of opportunity to succeed.

The man who says "I never had a chance," is just lying to himself as an excuse for his failure.

Lord Bacon said, "A wise man will make more opportunities than he finds," and that is much truer than the famous poem Senator Ingalls wrote that pictured opportunity as knocking only once at a man's door or the picture which Rabelais drew of Opportunity as a woman with a lock of hair on her forehead but with the back of her head completely bald; meaning that Opportunity must be grasped as it comes toward you for once it has passed there is nothing to seize.

Every day has its opportunity. Most of us think that these everyday opportunities are not big enough

THE CHEERFUL CHERUB

FIRST TO WIN GOLD MEDAL

Dale Collier of Rock Island, Ill., has the honor of being the first scout to win the new gold medal just designed for the Court of Honor, by Belmont Brown, the explorer. The incident which won the coveted National Scout Medal of Honor for young Collier occurred last January.

The boy had just started on an errand for his mother when he noticed three men walking on the ice on the river. Even as he saw them he perceived to his horror that the ice was breaking beneath them. He ran about 300 yards and found an old boat. There were no oars but he snatched up a piece of board and jumping into the boat broke his way through to where one of the men was sinking.

The boy threw him the board and pulled the boat, fast filling with water, close to the man, got him into it and back to shore. Then emptying out the boat he set out again in search of the others. This time, not having even the board to help him, he beat his way through the ice downstream with his fists. By this arduous process he finally got to where the other two men were. He managed with much difficulty to get both into the boat, which then began to sink from the weight and having shipped so much water. The men being unconscious, the boy bailed for dear life with his hands, screaming for help. Another boat reached them in time and all were gotten ashore. Not content with his already heroic achievement young Collier worked over the unconscious men trying to induce artificial respiration. He succeeded in the case of one man but the other who was just recovering from an illness never regained consciousness. The story is one of the most striking of the many noteworthy instances of scout pluck and resourcefulness that have passed through the hands of the Court of Honor and Scout Collier well deserves the honor accorded him.

SCOUTS ON THE JOB.
Out in Bellingham, Wash., some spectators chuckled with approval over the following incident and reported it to the local papers: A quart bottle of milk had been dropped in the street and lay splintered into a thousand pieces prepared to do their worst to all passing tires. Two lads in khaki "happened along." Instantly their sharp eyes took in the situation. "Boy Scout Safety!" they shouted in unison and swooped down upon the broken bits of glass, which in another moment were gathered up and deposited in the proper receptacle. An excellent object lesson this, to all who witnessed the incident and another proof that scouting is doing just what it claims to do—makes responsible citizens.

A small boy pushed accidentally to the ground in a school yard recently suffered a broken leg. Instantly there were boy scouts at hand to take charge

Mother's Cook Book
When we say we are undone, we mean only that we have weakened and run up the white flag.
We are contented because we are happy and not happy because we are contented.—Burke.

SOMETHING GOOD TO EAT.
A PUDDING that you may give the children is:
Crumb Pudding.

Roll one quart of bread crumbs and put into the oven to brown. Place in a pudding dish and pour over the following custard: Beat the yolks of three eggs, add three-fourths of a cupful of sugar, three table-spoonfuls of flour, a table-spoonful of butter and a grating of nutmeg. Cook over hot water until the custard is set. Cover with a meringue and brown in the oven.

Orange and Lemonade.
Prepare two cupfuls of sugar syrup rather heavy, add the juice of half a dozen lemons and two oranges, scald, then bottle and when cool place in the ice chest. A few spoonfuls of this fruit nectar added to cold water will prove welcome on a hot day.

Noodles and Ham.
Butter a baking dish and put into it a layer of cooked noodles, cover with a layer of ham or any chopped meat, then add another layer of noodles, add enough thin white sauce or broth to moisten, cover and bake until well heated through.

Mutton Stew With Peas.
Stew a piece of mutton until nearly tender, then add a pint of shelled peas, more or less according to the size of the family. When the peas are tender, thicken the broth with a very little flour and serve the peas around the meat. New potatoes may be added to the kettle and served with the peas.

Frozen Pudding.
Beat the yolks of six eggs until light, add a sirup made of two cupfuls of sugar and one cupful of water boiled for five minutes. Beat one moment, take from the fire and beat until smooth, chill, add one quart of cream, a teaspoonful of vanilla and freeze until mushy; then add a pint of fruit that has been crushed and put through a sieve. Peaches are especially good, or any fruit finely mashed. Freeze and let stand to ripen.

To Have a Clear Sweet Skin.
Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.—Adv.
