According to the last word from headquarters, Rev. Rolvox Harlan, Ph. In accordance with the broader program of work mapped out for the Community House it is expected a varied intellectual bill of fare will be offered. Prominent workers from several different denominations are expected to speak at frequent intervals in our chapel. Some 8 or 10 are already promising early dates. Some of these will be on Sundays, others on week nights.

We have no desire to compete with other local churches; but hope to co-operate with all as far as possible. We aim to supplement the good work being done by others by working as far as possible along different lines.

Herman Wunder, who has been undergoing a siege of sickness, is reported on the mend.

Albert Sacre has demonstrated what proper handling of the soil will do for so called "poor" land. There is a tract at the foot of the slope where the highway to Independence has its first turn that is

known as white land and was never considered worth much. Albert had the tract tilled. In plowing he use two kinds of plows changing from one to the other with each round of the field with his team. The first turned an ordinary furrow and the second worked at the bottom of the furrow, stirring and loosening the sub-soil. The land was fertilized, worked and planted and now has one of the kind of crops growing on the land that is of the kind you hear about but do not often see. It is acclaimed by all as a fine crop and Albert is to be congratulated on the success of his work.
