CHURCH ANNOUNCEMENTS

Burton Arant has accepted a position as assistant instructor in music at the Eugene Bible University and expects to take up work there next Fall.

Easter services in the various churches were largely attended.

The Normal students observed clean up day Wednesday afternoon and gave the campus an old fashioned polishing. A ball game among the boys finished the afternoon's job.

A farewell to Mrs. Denney and daughter was given them by the members of the Christian church choir Tuesday evening at the church. Mrs. Denney and Miss Violet, who has completed her Normal course, expect to return shortly to Eastern Oregon.

The Golden Rule Class of the Christian church enjoyed a pleasant business and social meeting in the church parlor last Friday evening. There was a large attendance and after business matters were disposed of and an Easter program given, refreshments were served by the entertainment committee.

Early radishes entirely free from maggot injury is easily possible and practical by use of cheap screen frames over the beds. Roof shaped frames 10 feet long, 2 1/2 feet wide and 1 foot high made of light material and covered with coarse cheese cloth or wire screen give excellent protection from the little flies that deposit the eggs. These are light enough to move with reasonable ease and with any care will last several seasons. The slight shade afforded by the screen assists in the growth of radishes and keeps them tender for a longer period. With three such frames placed over successive plantings 100 per cent maggot free radishes may be had all season.—O. A. C. Experiment station.

The Cost of Rotting Buildings
now running into millions

A ROTTING building is absolute waste, because a small investment in paint will save it. A building that is not protected by paint must either be rebuilt or repaired in a few years at a costly figure.

Check the costs. Compare the prices of paint and lumber. Can you afford to bear the expense of rebuilding or repairing your home, when to save it costs so little?

When you paint, make an additional saving by using the best paint. It spreads easily—saves labor cost. It covers more surface per gallon than "cheap" paint.

But more important, the best paint serves five or more years longer than "cheap" paint.

The best paints are scientific in formula and preparation. We've been making them for 73 years.

The best materials—PIONEER WHITE LEAD, pure linseed oil, pure zinc, and pure colors—are combined in Fuller's Paints in scientifically exact proportions with long-time skill.
