Now Is the Time for Passage of School Bill

## Vote 314 x Yes

Passage of the Compulsory Public School Attendance bill now—this year—will insure that a minimum number of private schools and private school pupils will be affected. Of the 36 counties of Oregon 16 are at present without any private schools whatever. The combined aggregate of pupils in all the private schools in five other counties is fewer than 200. The total attendance at the private schools, of the grammar grades, of Oregon is about 9841. The total attendance at the public schools, of the grammar grades, is about 131,689. Surely if the public schools are good enough for the 131,689, they are also good enough for the other 9841.

At present, while the private schools are few and small, is the time to make the change proposed by the public school bill.

**COSTS.** No tax will be levied for years to come, as the bill does not take effect until September, 1926, and no tax then if the amendment is in the courts for several years.

When all attend our free public schools the additional cost will be slight, for the overhead will be the same. Most of the children will find a place in existing classes and the added expense to the average taxpayer will be nominal. The great benefit to our nation will be worth many times the small cost.

Now is the time to pass this measure, insuring that in Oregon all of our children will be educated to a common patriotism, common ideals and a unified allegiance to our institutions.

## Save Repairs Paint Now

It Costs More to Rot a Building  
Than to Paint It

A GOOD way to determine how much it costs to rot a building is to find out how much lumber, needed to repair or rebuild, would cost.

You'll find that it costs several times as much as the paint which saves repairs. Paint your buildings when they need it. Rotting property is wasteful and extravagant.

The most economical paint, in the long run, is the best paint. It's easy to apply—saves labor cost. It covers more area per gallon than "cheap" paint.

The best paint serves five or more years longer than "cheap" paint.

The best paint is economical be-

cause it is scientific in formula and preparation. It is right.
