A feature of its official meetings is an unusually good dinner.

Increasing Demand

Our illustrated circular describes the Mountain States Power Company and the 47 communities served in four states. It shows the growth of the company's business, which growth continued in a very satisfactory measure during 1922.

A large amount of additional business is now awaiting the construction of additions and extensions. The demands for service increase steadily in a much faster ratio than the increase in population.

These services are vital to the public welfare. The market for them is as stable and enduring as our cities, towns and agricultural districts.

An investment in our 7 per cent Gold Notes is the kind of an investment you don't have to worry about.
