Local News

Mr. and Mrs. A. M. Arant start with Francis Arant this week for a visit with relatives at Milton in Eastern Oregon.

Prevent eyestrain and future ill health that neglected eyes will cause. With the beginning of the school year every child's eyes should be free from strain and pending eye trouble. Dr. Thompson service will help. Consult him next visit—Thursday, September 20, Monmouth hotel until 4 P. M.

Coming to Salem Dr. Mellenthin
SPECIALIST in Internal Medicine for the past twelve years
DOES NOT OPERATE

Will be at Marion Hotel Saturday, September 22 Office Hours: 10 a. m. to 4 p. m. One Day Only

No Charge for Consultation Dr. Mellenthin is a regular graduate in medicine and surgery and is licensed by the state of Oregon. He visits professionally the more important towns and cities and offers to all who call on this trip free consultation, except the expense of treatment when desired.

According to his method of treatment he does not operate for chronic appendicitis, gall stones, ulcers of stomach, tonsils or adenoids.

He has to his credit wonderful results in diseases of the stomach, liver, bowels, blood, skin, nerves, heart, kidney, bladder, bed wetting, catarrh, weak lungs, rheumatism, sciatica, leg ulcers and rectal ailments.

If you have been ailing for any length of time and do not get any better, do not fail to call, as improper measures rather than disease are very often the cause of your long standing trouble.

Remember above date, that consultation on this trip will be free and that his treatment is different.

Married women must be accompanied by their husbands.

Address 211 Broadway Bldg, Los Angeles, Calif.

Rev. Victor E. Morris visited with friends in this city Sunday and Monday.

Clares Powell, James Partridge, Jap Thompson and a nephew of the latter from the East left last Friday for the Salmon river country on a fishing expedition. They expect to be gone for two weeks.

He who has a thing to sell and goes and whispers in a well, Is not so apt to get the dollars as he who climbs a tree and hollers.

Notice of Application to Close Certain Streets and Alleys.

Notice is hereby given that the Common Council of the city of Monmouth, Oregon will meet in the council chambers on Tuesday, October 2, at 8 o'clock, for the purpose of considering application of Mrs. Ada Young, Roy M. Smith, administrator of the R. M. Smith estate, W. J. Miller and Mary McNeil to close all of such streets and alleys as appear in John E. Murphy's addition to the city of Monmouth, as shown on the plat of said addition recorded in the County Clerk's office of Polk county, Oregon, and bordering on Lots 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, and 21, for the reason that said streets and alleys are not used and have never been used as streets and alleys, and their closing will not interfere with the rights of owners of adjoining property.

By order of the Common Council. J. J. WILLIAMS, City Recorder. First published August 31, 1923.

The Farmer's Worst Enemy—Rats. The Farmer's Best Friend—Rat-Snap

These are the words of James Baxter, N. J.: "Ever since I tried RAT-SNAP I have always kept it in the house. Never fails. Used about \$3.00 worth of RAT-SNAP a year and figure it saves me \$300 in chicks, eggs and feed. RAT-SNAP is convenient, just break up a cake, no mixing with other food." Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by PERKINS PHARMACY

Blanket Time IS ALMOST HERE

THE WISE HOUSEHOLDER WILL not fail to take advantage of the unusual values we are offering in winter blankets at this time. Our several stores combined their buying power in the purchase of blankets at the time when mills were most anxious for business, and the saving is yours.

All good selling colors, fancy plaids and stripes are in the showing.

FARM REMINDERS

Oregon growers of brambles are confronted with a group of diseases for which no fungus or bacterial organisms have been found, although diligently sought on other places for many years. They are known as systemic, infection diseases, as they de-vitalize the entire plant system and are also transmitted from diseased plants to sound ones. Prevention is the "cure." Diseased plants are destroyed and new plants got from sound stock.

OUR STATIONERY IS GIVING SATISFACTION

Last week we printed one thousand statements for a man and by their aid he collected a small fortune. Two months ago a man bought of us some stationery for use when writing to his sweetheart, and now he is married. Another young man forged a name on a check printed in our office and is now in the penitentiary. Another young man stole some paper to make cigarettes with—he is dead. A young lady bought some of our paper to curl her hair on, and now she has a beau. (We only have a few packages of this kind in stock.) By using our stationery a person can collect old accounts, tell fortunes, make rain, change the color of the hair, have the teeth extracted without pain and find out the name of the future husband or wife, be successful in business, triumph over enemies or be elected to office. Give us a call.

Mrs. Nye returned last week from a visit to Waldport and her sister, Mrs. Glenn returned with her for a visit with relatives. Both ladies are sisters of Mrs. Neal.

Loganberry shoots are vigorous growers, frequently running 18 or 20 feet. If allowed to take their natural way they incline to spread out on the ground where they are in the way for pickers and are often damaged. It is best to train them along the rows during the growing season. Short sticks or wire hooks, three or four to a plant, will keep them in place.

RICKREALL

Mr. and Mrs. Vern Fox spent the week end at Pacific City.

Thrashing is about over and generally the reports indicate good crops.

Mrs. Reeves and Mrs. Roy Gregg who are running the boarding house spent the week end at Pacific City.

Hop harvest started Monday in this vicinity and there is no scarcity of pickers.

E. F. Craven and family left Thursday for Garabaldi where he will work in the sawmill.

Mrs. J. W. Fetzer of Independence visited with her parents, Mr. and Mrs. Peter Cook Thursday.

Mr. and Mrs. J. O. Price returned from Newport last week with their son Delbert who came down with the mumps. He is able to be out again.

The Oregon Construction company engaged in hard surfacing the West Side highway reached the end of their supply of gravel on the Whaley place and have moved their plant farther west on the Munson place.

(Continued from page 5)

Geology also furnishes us link upon link in the chain of events in the past to show us that God did once work in this way, creating higher out of lower forms of life. Biology, the study of plants and animals now upon the earth's surface, reveals again how species are related, and how life forms can be handed, the life forces so directed as to produce variations before our eyes. Embryology, the study of the development of new life within the parent's body from conception to birth, again

reveals that every animal and every person born into life goes through before birth a process of evolution from simple cells to higher forms. And wonderful enough, in this process of evolution the stages are similar to, if not duplications of, the steps in the past by which man has come from cell to man.

With the appearance of the physical animal called man, there entered into the creative process a new element,—conscious life, moral quality, a psychic force. With the emergence of this new element man ceased to be merely an animal, he became a living soul. In all the upward course of plant and animal life the creative urge was the presence of God—God's spirit, God's vital force, God's life, but always the plant and animal were blind to this presence of God, unconscious of him. But finally when the creative urge pushed itself from the inside of animal life, with such power as to create the physical instruments adequate to such realization, the presence of God came into realization of the moral man. God making himself known in and to a being like unto himself, with ability to think, to imagine, to hope, to create, to choose, to struggle for the right.

The question is often asked, why does not man continue to evolve in new and wondrous ways this body of his? He does, but not blindly. When God works through a conscious being his process of evolution does not need to wait for the slow march of the ages. Man using his brain instead of waiting for his body to change to suit his needs, works upon the material resources of the universe to create for himself artificial extensions of the body. Every tool, every machine, every instrument, every vehicle is but enlarged, more highly organized hand, foot, eye, or other bodily members. These artificial extensions of man's body are of more potent power, less physically cumbersome, more quickly evolved than additional bodily improvements. And at length, when the area of mechanical achievements shall have been ended, man will give all his attention to spiritual conquests. He will socialize, make ethical, just, and brotherly all the relations of life. Religion will then have its way with man. Here and there a few have

been giving their attention to this campaign. It has been launched already. There emerged into the consciousness of one great man the perfect realization of God's presence and he has become for us, by his teachings, by his life, by his living person, the way, the truth and the life. Under his leadership, the followers of the Christ, all humanity at length, shall gain greater heights of development where God and man shall dwell together on terms of loving and complete understanding and fellowship.

The important thing about man after all is not so much from where he did come, but to where is he going? And the theory of evolution holds out a far richer hope of a glorious destiny for man than any other theory. The Bible is crowded with the spiritual materials, with the moral values, with the divine thoughts, with internal truths, with the redeeming personality that will help man onward in his growth in a far more humane, a far less animalistic, a far diviner form of life. As an old theologian rightly said when the controversy raged over the question as to the movement of the earth or sun: "The Bible is given to teach us, not how the heavens go, but how men go to heaven." So now we may say the Bible is given to teach us not how men became men, but how they may become the sons of God. So why should I ask the Bible to inform me how to repair my car, how to raise my crops or cattle. The Bible has a higher service to render us if we let it.

NO MORE RATS

or mice, after you use RAT-SNAP It's a sure rodent killer. Try a Pkg. and prove it. Rats killed with RAT-SNAP leave no smell. Cats or dogs won't touch it. Guaranteed.
