Monmouth Meditations

The Herald wishes its subscribers a Happy and Prosperous New Year.

This is the season of the year when a man makes resolutions for the year ahead and pays up his lodge dues. Among the latter, not the least is the amount he planks down for the yellow and black piece of enameled iron that shows him to be fully paid up in the Amalgamated Royal Bangled, Triple Plated, Double Distilled Unterrified Association of Automobile Owners.

Since the Income Tax proposal got a wallop in the vicinity of the solar plexus new methods of raising the wherewithall are necessary if real estate is to get any sort of relief from its steadily growing burdens of keeping the wheels of progress in motion. What more alluring than a proposal to develop and profit from the distribution of electrical power. No one who has used electric energy can fail to realize its unique usefulness. And the citizen of today can only dream of the use of electric power in the years ahead. Heat, light, and energy; our assistant in the hours of labor, our companion and entertainer during our hours of recreation; our protector during the hours of sleep. It is too important to the welfare of all to be subject to the whims of a type of men who occasionally get control of a public monopoly.

It has been discovered that the total of the LaFollette vote in the recent election is nearly five million or seven hundred thousand more than the vote given Roosevelt in 1912. It might also have been stated that his vote was greater than Grant, or Lincoln, or Jackson ever received, and as a comparison it would have about the same significance. But when it is considered that high tide for the Democratic party was in 1872 when Samuel J. Tilden received over fifty per cent of the popular vote, and that since that time the proportion has been steadily growing less, until in 1924 the party vote was only one third of the total, then the total LaFollette vote gets a new significance. If the vote can be held and additions gained during the next four years, the third party will get to a place where it will cause the politicians to sit up and take notice.

People who missed the chance to enjoy the cold weather just past because they were too busy thawing out water pipes, have only themselves to blame. As a New Year's resolution it is suggested that one and all resolve to put their pipes in frost proof casings and then when the next bit of the Arctic circle drops in on us we can all get out and welcome it in a fitting manner.
