CONSOLIDATES INSTITUTIONS

W. H. Hinkle of Philomath has bought the undertaking businesses of H. H. Jaspersen and Bice & Calbreath. The two institutions are being invoiced this week. Mr. Hinkle is a graduate of Finley's undertaking institution of Portland and is a most estimable young man, coming here with highest recommendations. He will make extensive improvements. In the very near future he expects to build a modern bungalow to contain undertaking parlors and chapel.

To what Mr. Jaspersen will turn his attention in the future, he has not yet decided, but that he will remain in Independence where he has so many friends, is hoped. He has been in the undertaking business for more than twenty-five years, not all this time in Oregon, however, and has buried almost a thousand people. He is nearly seventy years of age and, having a competency, will probably retire from active business.

Bice & Calbreath have sold only their undertaking business and will still continue in their furniture business here.

Old Wheat Flour

Everyone knows that old wheat flour is superior to flour made from new wheat. Remember that all our brands of flour are made from old wheat, we having reserved enough to last us until the first of the year. Be sure and ask your grocer for our brands of flour made from old wheat and take no other.—Oregon Milling and Warehouse Co. 18tf

Perfection of Detail

Our Superior Steel Ranges embody best construction and features in these popular style ranges. Attractively nickled, malleable iron, joined with cold driven rivets are some of the features of this fine range. It is not an ordinary range. It is not bolted together so that in a short time the bolts work loose, the putty drops out and "air leaks" come in, causing waste of fuel and slow baking. The Superior Steel range is perfection in every construction detail.

Bridge & Beach Superior

These heaters give you satisfaction. They warm the apartments better than any other stove, because they are made to throw out the heat. You know that with some heaters you are freezing when the stove is red hot. Those are not the SUPERIOR—they are wood eaters.
