Best Treatment for Colds

"Most ordinary colds will yield to the simplest treatment," says the Chicago Tribune, "moderate laxatives, hot foot baths, a free perspiration and an avoidance of exposure to cold and wet after treatment." While this treatment is simple, it requires considerable trouble, and the one adopting it must remain in doors for a day or two, or a fresh cold is almost sure to be contracted, and in many instances pneumonia follows. "1892" Pure Spun Aluminum Ware

15 Days at Our Risk

Buy any piece of this ware from your dealer—try it fifteen days. If in that time you find that all the claims we make for it are not true, and if it is not just as represented, take it back and get your money.

Here at last is the ideal kitchen and cooking utensil—"The Ware That Wears"—made from Pure Spun Aluminum, and guaranteed by the makers to last 25 years with average usage. "Spun" Aluminum, mind you, not cast Aluminum, which will sometimes crack and scale. Spun Aluminum Ware will never crack, peel, scale or break.

Enamel ware is iron coated with colored glass. Iron expands with heat. Colored glass does not, but chips off into the food with dangerous results to those who eat it.

"1892" Pure Aluminum Ware Will Not Scorch or Burn

—is easily cleaned, will not rust or corrode. Handsome in appearance. Looks like silver, but weighs only about one-fourth as much, and is light and convenient to handle.

"1892" Pure Aluminum Ware Saves Doctors' Bills.

It enables you to bake bread, pies, pancakes, etc., without grease, which is the great cause of dyspepsia and indigestion. Aluminum gridles require no grease; hence are smokeless and odorless.

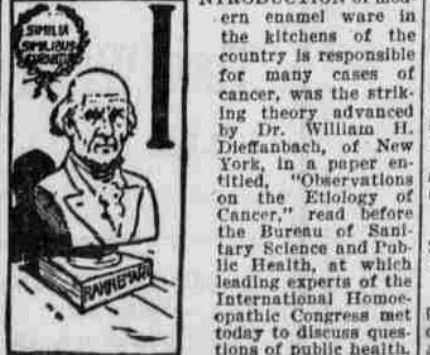

The original and only genuine Spun Aluminum Ware is made by the Illinois Pure Aluminum Co. at Lemont, Ill. Every piece bearing their trade-mark, the Maltese Cross, and marked "1892" Pure Aluminum Ware is absolutely pure, wholesome and hygienic—guaranteed for 25 yrs.

ENAMEL WARE CAUSES CANCER, SAYS DOCTOR

Tells Homoeopaths Particles From Dishes Start Growths in Stomach.

Special Dispatch to The North American. ATLANTIC CITY, Sept. 11.

INTRODUCTION of modern enamel ware in the kitchens is responsible for many cases of cancer, was the striking theory advanced by Dr. William H. Dieffenbach, of New York, in a paper entitled, "Observations on the Etiology of Cancer," read before the Bureau of Sanitary Science and Public Health, at which leading experts of the International Homoeopathic Congress met today to discuss questions of public health.

The argument advanced was that chipping of the hard-coated dishes used in preparation of meals allowed minute but dangerous particles of foreign matter to become mixed with the food. These are taken into the stomach, where the cancerous growth is caused by abrasions which they make in the walls of the organ.
