TREES THAT ADORN STREETS

Care Should Be Given These Valuable Assets to Town Improvement.

All planting and care of trees that adorn and greatly help to beautify and improve the streets should be done by the town or by permanent organizations authorized to carry on the work. The poorer the soil the larger should be the hole for the tree. If convenient add rich soil. Spread the roots carefully. Fill in with pulverized soil and press into contact with the roots. Pro-

tect the tree with a line of wire netting supported on three or four posts. It adds to the expense, but pays in the long run.

When a tree shows signs of decay in places get busy at once and secure the services of a competent tree doctor. Have the wound dug out, scraped and a neat cement filling put in, thus prolonging the life of the tree.

But in the protection of the young trees don't forget to stir up civic pride. Provide for the small boy and enlist him if you can. It pays better than to permit arrest or threaten with arrest. Don't permit telegraph linemen to mutilate trees or climb them with spikes. Secure the passage of ordinances forbidding wires and cables underground wherever practicable. Telegraph and telephone poles are unsightly and interfere with all schemes of street improvement and tree planting.

Women Paint Their Church.

Women are today playing a prominent part in the improvement and beautifying of towns. In Burlington, N. J., a number of women members of the congregation of a prominent church of that place undertook the job of painting their edifice last a campaign of church improvement should fall through by a lack of funds. Heeded by the pastor's wife, they bravely set to work with paint pots and brushes and then formed a pin money fund to employ a man to decorate the top of the building.
