Value of Cheerfulness.

Cheerfulness is a thing to be more profoundly grateful for than all that genius ever inspired or talent accomplished. Next best to spontaneous cheerfulness is deliberate, intended and persistent cheeriness which we can create, cultivate and so foster and cherish that after a few years the world will never suspect that it was not a hereditary gift.-Helen Hunt Jackson.

III-Fitting Shoes to Blame.

The cause of many broken insteps comes from imperfectly fitted shoes. When fitting, if there is too much space left in the toe of the shoe there is no doubt about it that as soon as the shoe is worn for a short time the heel will begin to chafe and cause the wearer much annoyance that could be well dispensed with, if the clerk is given enough time to fit the foot right. The ball of the foot should be at the curve of the sole.

Care of Shoes.

Evening shoes should be wrapped in tissue paper, and white shoes will turn yellow unless incased in blue paper. On most light shoe leather a spot or stain can be washed off, but where this is impossible or the shoe is too badly soiled it is better to dye it a darker color or black. Various shoe dyes can be purchased and with a renewal of color now and then you have practically provided for yourself a new pair of shoes.

DON'T BUY WATER.

When you buy bluing for your laundry work, get RED CROSS BALL BLUE. A pure solid ball of blue, not a bottle of colored water. Used in thousands of homes for 20

years. Makes clothes pure white. Price, 10 cents. AT ALL GROCERS.

When Beccher "Hollered."

Coming home from the morning service one Sunday Dr. Beecher threw himself on a lounge and said, in a tone of deep dejection: "I believe that was the worst sermon I ever preached" One of his daughters protested that she had seldom heard him when he was more energetic.
