naturally belongs to the children, as the idea of it was taken from a very old children's game called the shepherdess, which is still very popular in France.

The children form a line and then the leader stands a little to the left and the next child a little to the right cent lamp can be inserted for warming and they raise their hands as high as their heads and from a barrier, which all the sheep must pass through. The next child in line becomes the shepherdess and calls to her little lambs to follow her through the barrier, which they do while singing a little French song.

After the last sheep has passed safely under the two children that formed the barrier drop into line at the end, and the two at the head of the line form the next barrier and so on, until every child has had a turn at being part of the barrier for the others to pass under.
