

IT COSTS "Credit Stores" MORE

To do business than "Cash Stores" and then someone must pay for the losses from bad accounts.

The merchant can't afford to stand the loss so he charges it up to his customers who do pay. Of course the extra charge is concealed in the price but it's there just the same.

You'll realize how much you really pay for the "Few Day's Accommodation" at a credit store if you will compare our prices, which are based on the spot cash plan, with "credit store" prices.

Reliable Merchandise
at prices that "credit stores" can't match is the foundation of our success.

We are now showing a splendid line of

WHAT IS CHIROPRACTIC?

All parts of the body are controlled through the Nerves. Interference with Nerve impulses causes Disease. CHIROPRACTIC is the Science and Art of removing the interference with Nerve impulses, thereby allowing nature to cure the disease. A few of the many diseases cured by CHIROPRACTIC: Appendicitis, Constipation, Female Diseases, Fevers, Gall Stones, Gout, Headache, Neuralgia, Paralysis, Piles, Rheumatism, Spasms, and the various diseases of the Stomach, Liver, Kidneys, and nerves.

DR. D. G. REMPEL,

Chiropractor, and Nerve Specialist, a Graduate of the Pacific College of Chiropractic, Inc., of Portland, Ore. Monday, Wednesday and Friday.—Hours: 9:30 a. m. to 2:00 p. m. Opposite Depot, Independence, Oregon

WHEN EVERYTHING IS RUNNING SMOOTHLY about your auto, how much better you enjoy your outing. When you know that we've looked it over and you don't have to worry about this, that or the other thing getting out of order. What a satisfaction to you. Be on the safe side and bring your car here before starting out.

THE INDEPENDENCE GARAGE,
S. H. Edwards

Our Feed Will Put GO into any horse to whom it is given regularly.

Because

It is the SOUNDEST, RIPEST and CLEANEST Feed to be had. You know that good eating improves a man's physical condition. Learn what good eating will do for your horse by giving him our feed.

OPIUM BROUGHT BY HIGHER UPS

Inspector and Steamship Agent
Indicted for Smuggling.

Intercepted Letter Leads to Discovery
of Extensive Deal-Drug Taken
Ashore at Night.

San Francisco—Robert Donaldson, assistant superintendent of navigation of the Pacific Mail Steamship company, and Henry Gallagher, United States customs inspector, were indicted here by a Federal grand jury charging complicity in an opium smuggling conspiracy, in which, it is said, many other men are implicated. Warrants for their arrests were issued and they are being served by United States marshals.

The indictments were based upon the testimony of David Powers and Emil Fiedler, employees of the Western Fuel company, arrested in Oakland, December 18, 1911, with several hundred tins of contraband opium in their possession. Powers and Fiedler served four and six months respectively in the Alameda county jail.

The supposed connection of Donaldson and Gallagher with the smuggling plot was revealed through the interception by government officials of a letter given by Fiedler, while in jail, to a discharged prisoner.

Powers testified before the grand jury that he had been approached by Donaldson in December, 1911, with a proposal to assist in landing opium concealed on the steamer Siberia, which then was being loaded with coal by a barge on which he and Fiedler were working. He at first refused to consider the matter, he said, but later decided to "take a chance." He was taken aboard the Siberia and met two Chinese cabin boys, who had secreted the opium. Two nights later, said Powers, 320 tins of opium were transferred from the Siberia to the barge.

MILLIONS FOR TIMBER BONDS.

\$12,000,000 Invested in Western Securities This Year.

Portland—More than \$12,000,000 has been brought from Eastern money centers and invested in timber bonds since January 1, according to a statement made before the Portland Realty board by Theodore B. Brown, of Brown & Brown, timber bond brokers. This new capital was invested in bonding propositions, nearly all of which are in Portland territory.

"The business of floating bonds on standing timber has reached big proportions during the past few years," said Mr. Brown. "The ability to realize on standing timber by the bonding method has been of great benefit to the Northwest. As a result operators have been able to continue the logging industry to advantage. Hundreds of men have been given employment and the development of this section has been generally aided."

"Oregon and Washington timber bonds are now in favor with Eastern capitalists. On account of the efficient patrol of the forests, danger from fires has been reduced greatly, thus providing better security for timber bonds."

Frog Lives Ages in Rock.

Los Angeles—Workmen engaged in clearing and blasting rock on the L. D. Loomis property, in Santa Monica canyon, found a frog imbedded in solid limestone, three feet beneath the surface. It had been encased in rock for hundreds of years. Apparently petrified, the amphibian was taken by the astonished workmen and laid in the sun. In a few moments it suddenly showed signs of life. After several minutes it blinked confusedly, drew a long breath, and in long leaps traveled a hundred feet before the workmen could recapture it.

The lump of limestone from which it was taken was carefully packed and taken to Santa Monica. It shows clearly the exact shape of its occupant, to the minutest detail.

Bayonets Win Battle.

Rome—The most sanguinary engagement of the war in Tripoli was fought Thursday near Derna, a town on the Mediterranean coast 140 miles northwest of Benghazi. The Italians lost 61 men killed and 113 wounded. The Turks and Arabs left more than 800 dead on the field. Forty-one prisoners, including an Arab chief, fell into the hands of the Italians. The battle opened at daybreak, when a force of Turks and Arabs surprised and attacked the Italian lines. The fight raged for four hours.

Aviator's Fall is Fatal.

Shenandoah, Va.—Aviator Russell Blair, of Kansas City, while making an exhibition flight here, was killed in a fall from a height of 30 feet. Blair had just made a successful flight and had landed some distance from the crowd. When he attempted to rise from the ground again his machine struck an air current and turned over. Blair was pinned underneath the wreckage, and when aid reached him he was dead.

Work Stops for One Man.

Pottsville, Pa.—Because one man refused to join the union, several thousand workmen are idle at the collieries of the Lehigh Coal & Navigation company in the Panther Creek valley, and only one mine and three washeries are working.

JOHN DEERE SPREADER

The Spreader with the Beater on the Axle

The Simplest Spreader Made

Entirely New ... Nothing Else Like It

THE JOHN DEERE SPREADER—The Spreader with the Beater on the Axle—is as much of an improvement in spreader manufacturing as the self-binder was over the old reaper. It is made along entirely new and different lines from the ordinary spreader.

The first manure spreader ever made was built in 1878 by the Kemp & Burpee Manufacturing Company. Up to the time of the John Deere Spreader every spreader has been made along the same general lines as this first machine. Power was taken from one end of the main axle and transmitted, either through chains or gears, to the beater, mounted above and in the rear of the axle. Heretofore the only improvement in manure spreaders since the first one was made in 1878 has been in the refinement of details.

The John Deere Spreader is a radical departure from the old method of construction. It is made along entirely new lines and is a great improvement over the old style spreader. Come in and examine the machine and you will readily see why the John Deere Spreader is so far superior to any spreader heretofore constructed.

Even if You Don't Need a New Spreader Now come in and get one of our spreader books. They contain a number of articles on why farm manure should be used on the land, how it should be applied, how it should be stored, the value and effect of using it in various ways. In addition there is a detail description of the John Deere Spreader with illustrations in colors of this spreader working in the field.
