THOUSAND ARE DEAD IN TYPHOON IN PHILIPPINES

Manila—The typhoon that swept over several of the Philippine islands on October 16 resulted in the death of more than 1000 persons. Four unidentified Americans, three men and a little girl, were among those killed.

The coasting steamer Tayabas foundered off Escalante. The bodies of 15 Filipinos and Spaniards came ashore.

The typhoon virtually wiped out the towns of Bogo, Danao, Toledo, Masasin and Escalante.

Washington, D. C.—The casualties are estimated at 400 on the island of Cebu, according to a dispatch to the bureau of insular affairs.

It was reported many vessels were sunk in the harbor, hundreds of small craft were driven ashore by a tidal wave, and that possibly half of the 600,000 persons on the island were made homeless.

GREEKS ROUT 600 TURKS.

Artillery Duel Begins Fight—Siege Guns Captured.

London—An order has been given to the army of Thrace to take a vigorous offensive movement against Bulgaria, according to a Constantinople dispatch to the Daily Telegraph. In the meantime the Turkish fleet has been recalled from the Black sea and ordered to pass through the Dardanelles, with instructions to seek out and attack the Greek fleet.

An Athens dispatch to the Telegraph says that after a preliminary artillery duel between the Greeks and 6000 Turks at Elassona, the Greek infantry charged repeatedly and finally dislodged the Turks, capturing their siege guns.

The Turks retired north. It is estimated that 10,000 Turks are concentrating at Servia, a small town in Macedonia, 20 miles from Mount Olympus, with strong artillery.

The Montenegrins have captured Nueva and Gualand, but they are regarded as minor affairs and no real resistance was offered.

The Turkish warships fired one hundred rounds at Varna but without effect, says a Sofia dispatch to the Times. Two Bulgarian torpedo boats then issued from the harbor and engaged the squadron, one ship of which withdrew. It is believed she was struck by a torpedo, but not seriously damaged.

Eventually the Turks proceeded to Balchik, 25 miles to the north, where they indulged in another harmless bombardment. They then returned to Varna but kept at a respectful distance, apparently fearing mines.

At nightfall the Bulgarian torpedo boats came out again, but no engagement was reported. The Turkish squadron was at Varna on Sunday, but did not open fire.

Another dispatch to the Times says that a Bulgarian column from Koes-tendil captured Djumbala, Mahomia and Bankso, in the Bazlog district, without resistance. Several villages were burned by the retreating Turks.

A Saloniki dispatch, dated October 18, says a battle between Turks and Servians was in progress north of Pristina.

An interview with Kiamil Pasha, president of the council, is sent by the Constantinople correspondent of the Chronicle. Protesting against King Ferdinand's attempt to make a holy war of the struggle, Kiamil Pasha expressed fears of the intervention by a certain armed power which he thought might attack Turkey's Asiatic provinces, now vulnerable because the troops have been drafted from there into European Turkey. Kiamil Pasha said:

"I am convinced that Europe's boasted humanity is dead. King Ferdinand's hand is only that of a puppet to strike at Turkey's heart. I hope that England will be true to her splendid past and stand by us unflinchingly in the approaching hour of national peril and prevent our being absolutely crushed."

"As an old man with one foot in the grave, I express with all seriousness the fear that the Balkan war will be the prelude of a gigantic struggle involving Europe."

Marconi May Lose Sight.

Spezia, Italy—Guglielmo Marconi, the wireless inventor, whose right eye was removed last Thursday, has developed alarming symptoms. He has sleepless nights, his temperature is high, and he is suffering great pain. Professor Bayardi, the Turin specialist, who assisted at the operation of removing the right eye, was summoned in haste and is now attending Marconi. Notwithstanding a reassuring bulletin issued Sunday, it is feared that complications are threatening the other eye.

Three Airmen Killed.

Bordeaux—A French aviator, Amers Lacour, was killed Sunday while giving an exhibition of fancy flying at Mussidan. A heavy gust of wind overturned his monoplane, and the aviator fell 500 feet.

Berlin—A balloon exploded Monday while sailing through a thunder storm over Grossenheim. The two occupants, Lieutenant Stiehler and Engineer Goericke, were killed.

Montenegrins Win Two-Days' Battle Cetinje, Montenegro—It is officially announced that the Montenegrin forces have captured the town of Pluva. The battle lasted two days.

CITY HONORS DEAD 'NEWSBOY

Thousands Weep for Billy Rugh, Hero of Gary, Ind.

Streets Blocked and Funeral Held in Open—Coffin Showered With Coin for Monument.

Chicago—A funeral such as was never known before was accorded "Billy" Rugh, "newsboy," who gave his life that a girl might live. Greater homage in pageantry and grandeur has been paid kings and statesmen beloved by nations but this was a spontaneous tribute from the hearts of men and women in honor of a hero.

Fifteen thousand persons, singing "Nearer My God to Thee," crowded about his casket on a street corner in Gary, Ind., Sunday afternoon. By their very numbers they had blocked a mile long funeral cortege and prevented the holding of a church service.

Strong men of many races, workers in steel mills that were closed in Rugh's honor, wept as they formed in line with their employers and walked slowly past the coffin of the dead "newsboy." Their wives and children were with them and many stretched forth their hands in an effort to express their reverence by offering money for the erection of a monument.

Policemen found difficulty in explaining to hundreds of the mourners, for they all were mourners, although some could not speak English, that they must not shower the coffin with money, but must keep it until arrangements for the memorial tribute could be made.

The coffin, buried in the floral offerings of city officials, fraternal organizations and private citizens, was carried in a casketed fire department automobile toward the First Methodist church. Thousands blocked the streets and the church was filled to overflowing long before the advance squad of policemen, leading the procession, arrived.

Then the plans were changed and it was decided to hold the service from the church steps. But the procession never got that far. When the corner before the church had been reached the crowd was so dense that this plan had to be given up.

Instead, a space was cleared in the center of the road and there, upon low rests, the coffin was placed.

Led by the church choir and with music furnished by two bands that had donated their services, the crowd sang old Gospel hymns as Rev. J. M. Avann stepped into the fire department automobile and utilized the seat as his pulpit. Throngs of persons upon nearby porch roofs joined in the singing.

The pastor likened the dead hero, to the Christ, and quoted from the Bible, "He saved others, yet himself he could not save." This was his text.

CAPTURE TURKISH WARSHIPS

Greek Gunboats Make Big Haul in Mediterranean.

San Francisco—Three Turkish ships were captured and one destroyed Sunday by the Greek gunboats A and B, according to a cablegram received here by T. B. Mountanos, editor of the California Greek newspaper. A Turkish torpedo boat destroyer and two gunboats were captured in an engagement against the Greek port of Navan. The gunboats captured were said to be part of a consignment of five ordered from Germany by the Turkish government. The cablegram was dated Athens.

London—On the mountainous front of 200 miles from Kirk Kilesseh in the east to Uskup in the west the advance of the allied armies into Turkey continues. The Turkish army appears to be acting on the defensive. Its outposts are slowly withdrawing and are attempting only to screen the way for mobilization while the main forces are marching toward the frontier.

Wood Favors Presidio.

San Francisco—Major-General Leonard Wood, chief of staff of the United States army, announced after an inspection tour here that he would recommend to the War department that congress be asked for an appropriation of \$4,000,000 for improvements at the Presidio. His plans, he said, included provisions for an additional regiment of infantry and artillery each, a concrete warehouse and a new administration building, all of which he said he hoped to see completed by 1915.

Thief Passes Up \$25,000.

Skagway, Alaska—Nearly \$25,000 in gold in the Wells Fargo company express office was passed by a robber who sandbagged Agent Herbert Taylor Saturday night.

The robber took a package containing \$1200. When Taylor went into a rear room for a bucket of coal the robber, who had been concealed in a closet, struck him over the head. Taylor lay unconscious until next morning.

Two Aviators Fall to Death.

Geingen, Germany—An aeroplane piloted by Lieutenant Weissbarth, a German military aviator, and carrying a passenger, fell to the ground from a great altitude while flying near here, and both men were killed.

JOHN DEERE SPREADER

The Spreader with the Beater on the Axle

The Simplest Spreader Made

Entirely New ... Nothing Else Like It

THE JOHN DEERE SPREADER—The Spreader with the Beater on the Axle—is as much of an improvement in spreader manufacturing as the self-binder was over the old reaper. It is made along entirely new and different lines from the ordinary spreader.

The first manure spreader ever made was built in 1878 by the Kemp & Burpee Manufacturing Company. Up to the time of the John Deere Spreader every spreader has been made along the same general lines as this first machine. Power was taken from one end of the main axle and transmitted, either through chains or gears, to the beater, mounted above and in the rear of the axle. Heretofore the only improvement in manure spreaders since the first one was made in 1878 has been in the refinement of details.

The John Deere Spreader is a radical departure from the old method of construction. It is made along entirely new lines and is a great improvement over the old style spreader. Come in and examine the machine and you will readily see why the John Deere Spreader is so far superior to any spreader heretofore constructed.

Even if You Don't Need a New Spreader Now come in and get one of our spreader books. They contain a number of articles on why farm manure should be used on the land, how it should be applied, how it should be stored, the value and effect of using it in various ways. In addition there is a detail description of the John Deere Spreader with illustrations in colors of this spreader working in the field.
