Men and Women.

As times go on we have the two results to be anticipated. Men reach the point—usually early in life—where business or politics absorbs their whole attention, and they have little time, strength or interest left for the broader culture and the amenities of life, while women are prone to be too much preoccupied with these things, to the injury of the home—not perhaps, in its smooth running, for in the average American home the wheels of its machinery do usually run smoothly, though at great expense and to the injury of the home spirit.

The Calf to Raise.

I never raise a calf from a cow that will not give at least 20 quarts of milk a day, and she must be bred to a pure-bred bull. The percentage of poor heifers when they come to freshen with this method is very small. The custom of feeding milk feeds is not on the increase now, but it had grown heretofore to a very great extent. Many farmers grow as much clover as possible, also peas with oats. The silo has made its appearance on most of the dairy farms. This helps much where properly managed, says a writer in an exchange. Good corn silage fed in connection with clover hay or oats and pea hay and one feed of timothy and redtop mixed a day with a small grain ration should make a good food of milk if you have good cows. Without a good dairy one cannot make milk, regardless of the feed used.

"Thou Madest Me for Thyself."

O thou God Omnipotent, who so carest for every one of us, as if thou carest for him alone; and so for all, as if all were but one! To thee will I intrust whatsoever I have received from thee. So shall I lose nothing. Thou madest me for myself, and my heart is restless until it repose in thee. Amen.—St. Augustine.

No Hurry for That Vehicle.

A short-sighted old lady in a hurry to mount a tram car held up her umbrella and shouted to the driver of a passing vehicle, "Stop! Stop!" to which the driver replied, "Don't be in a hurry, mum; it ain't your turn yet." It was a hearse.

"Method in Madness."

"Why do you always insist on talking about the weather to your barber?" "You wouldn't have me talk about anything so exciting as politics to a man who is handling a razor, would you?"

PURE FOOD LAW NOT MODERN

Centuries Ago Tradesmen Who Adulterated Goods Were Most Severely Punished.

Pure food laws are not quite so modern an invention as we may believe. Dr. Reinsner has made discoveries in Palestine that seem to indicate some sort of supervision of the food supplies delivered to the palace nearly 8000 years ago. Labels have been found that were once affixed to "a jar of pure olive oil." We may wonder what tests were employed and what would happen to the man whose oil was found to be not pure. Probably something unpleasant, for there was no Supreme court in those days. We know what happened in the middle ages to the enterprising tradesman who adulterated his goods. In 1444 a Nuremberg merchant was burned alive for mating foreign material with his saffron and the saffron itself was used for fuel. Probably that artistic touch impressed the matter upon his memory.

Some Augsburg bakers who used false weights and bad flour were ducked in a muddy pool, and through a faulty knowledge of the human respiratory system, or sheer carelessness, they came to the surface dead. In 1482 a wine merchant was ordered to drink six quarts of his own adulterated wine, and as he died soon after it is evident that the adulteration must have been serious. It is true that he had to finish the draft in a given number of minutes, and a small number at that, but in those days they had a pleasant way of weighing the scales and loading the dice upon the side of justice.

Civilization has changed all that. Nowadays we shiver with apprehension lest a rogue shall be punished.—San Francisco Argonaut.

Arctic Bounty. The account of the four years' stay of Vilhjalmur Stefansson and Dr. Anderson in the Arctic regions of America, during which they made long journeys alone with nothing to depend upon for a living but the hospitality of the natives and their rifles, furnishes a new illustration of the remarkable productiveness of the far north. Persons are likely to suppose that it is the tropics which are most spontaneous in the production of food for human beings. The fact is that the contrast between equatorial and Arctic regions is not so very great in this regard. Early explorers of the region of the upper Amazon found they must carry supplies or starve to death. There is game there, but it cannot be reached in the jungles. This was the experience of James Orton, the American traveler, and in his work on the Amazon he recalls the fate of the mighty Pizarro, who tried to penetrate that country, but retreated from it upon a diet of lizards, dogs, saddle leather and sword belts just in time to save his life. Similar experiences are to be encountered in much of tropical Africa. It is true that some tropical islands give their inhabitants a free but monotonous living, but, then, so will the ice-bound country around the mouth of the Mackenzie.

HINTS ON VEGETABLES

WILL BREAK OR SNAP CRISPPLY WHEN FRESH.

New Recipes for the Preparation of Various Vegetables That Are Well Worth Trying—Suggestions in Cooking.

A good digestion waits on appetite. Fresh vegetables will break or snap crisply. To cook vegetables, put into boiling water, slightly salted, and boil steadily until done. After they are done, drain at once.

Cauliflower or Green or Wax Beans. Cauliflower or Kohlrabi—Half cup of sour cream, yolk of one egg, one small teaspoon flour, small lump butter, a little nutmeg, half cup of water from the vegetables, which should be boiled in salt water. Stir together in sauce pan and cook gently to prevent curdling. Add salt if necessary.

Potatoes—Peel and cut into small squares, or pieces of equal size, raw potatoes; slice in one-fourth as much onion, two green peppers, and add boiling water to cook. When nearly done add a little sweet milk, salt and pepper and a liberal piece of butter. Thicken with little flour rubbed in milk or butter. They will be ready in 15 minutes.

Scalloped Tomatoes—Pour off nearly all the juice from a can of tomatoes; put a layer of bread crumbs in the bottom of buttered dish, then a layer of tomatoes seasoned with pepper and salt and a little butter and sugar; continue till dish is full, finishing with bread crumbs; cover and bake until hot, then remove cover and brown.

Cauliflower and Cheese—Cook cauliflower in salted water, cover with drawn butter sauce, then with ground eastern cheese or parmesan and place in a hot oven until cheese is browned a little.

Baked Onions—Boil until tender, drain and cut in halves or leave whole if preferred; put in a dish, pour over them a cup of cream or milk; sprinkle with salt, cover top with cracker crumbs, cut tablespoon of butter in small pieces, put over top and put into quick oven and brown.

Fried Celery.—Boil until nearly tender, then dip into a mixture of egg and bread crumbs and fry in butter or oil. Serve hot.

Creamed Cabbage—Take a firm head of cabbage, chop rather fine and cook in salted water from a half to three-quarters of an hour; drain off water, put in a piece of butter, season and pour over enough cream or milk to almost cover cabbage; heat to boiling point and serve. This will be found a very nice way of cooking cabbage, and many who do not like cabbage relish it when prepared in this manner.

Stuffed Egg Plant—Cut the egg plant in half, remove inside, leaving shell one-fourth inch thick; boil the inside when tender, add one large tablespoon bread crumbs, a little chopped onion, a tiny bit of garlic and a small piece of butter; season with salt and pepper; fill shells with the mixture, sprinkle bread crumbs and grated cheese over tops and bake about 20 minutes. One egg added to every two egg plants is a great improvement.

Stuffed Chili Peppers—Take a half dozen large, green peppers and brown on top of stove; when done peel carefully and make a stuffing of cold meat chopped fine; add a small piece of onion and tomato, chopped, a little thyme, parsley and salt; then fry. When done, stuff the chilis; make a thin batter of flour and two eggs, dip the chilis in butter and fry in hot lard like doughnuts. When brown, arrange in a dish and make a sauce of browned flour and pour over them.

Canned Corn Fritters.

Empty the contents of a can of corn into a colander, run cold water over it to rinse off the liquid in which it was cooked, and thus rid it of the tinny taste, then chop the corn fine. Mix with two cupfuls of this a cupful of milk, to which you have added a pinch of soda, a tablespoonful of melted butter, two beaten eggs, two tablespoonfuls of flour and salt and pepper to taste. Drop by the spoonful into boiling fat, drain on brown paper laid in a colander and serve hot.

Spaghetti au Gratin.

Boil a half-pound of spaghetti in salted water until it is tender—about twenty minutes should suffice—take it from the fire, drain, and mix with it a half cupful of your chicken stock, a tablespoonful of butter, pepper and salt to taste and turn into a large 'bake' dish or into individual casseroles. Strew grated cheese thickly over the top, set in the oven long enough to brown, and serve.

Apple Snow.

Prepare apples as you would for sauce, cook, and when cool put through squeezer, sweeten and flavor to taste, then take the whites of two eggs and beat to a stiff froth, then beat the apples in gradually with the beaten whites. When together beat for five minutes until it appears like a white foam. This is mixed with boiled custard.

Tutti-Frutti Candy.

Three cups of sugar, one cup of butter and one cup of milk should be boiled together for 20 minutes, then beaten as for fudge. Add to this one cup of chopped walnuts, one-quarter pound of chopped figs and one-eighth pound of chopped candied cherries. Cool in buttered pans.

Stevenson's Criticism.

Robert Louis Stevenson once went to hear Charles Halle play the piano at the Queen's Hall. After the performance Stevenson, in his black shirt, walked in silence out Regent street to Oxford circus. He stopped at Oxford circus and, in a slow, meditative voice, pronounced this excellent criticism on the English musician he had heard: "The manner of the elderly statesman at the piano was somewhat austere and chilling."

HOW MRS. BROWN SUFFERED

During Change of Life—How Lydia E. Pinkham's Vegetable Compound Made Her a Well Woman.

Iola, Kansas.—"During the Change of Life I was sick for two years. Before I took your medicine I could not bear the weight of my clothes and was bloated very badly. I doctored with three doctors but they did me no good. They said nature must have its way. My sister advised me to take Lydia E. Pinkham's Vegetable Compound and I purchased a bottle. Before it was gone the bloating left me and I was not so sore. I continued taking it until I had taken twelve bottles. Now I am stronger than I have been for years and can do all my work, even the washing. Your medicine is worth its weight in gold. I cannot praise it enough. If more women would take your medicine there would be more healthy women. You may use this letter for the good of others."—Mrs. D. H. BROWN, 509 N. Walnut St., Iola, Kan.

CUTTING DOWN THE FLESH

Heroic Struggles of a Fat Man Who Thought the Scales Were Deceiving Him.

I have about come to the conclusion that the good Lord intended some of his creatures to be fat and some thin, regardless of medicines and so-called infallible cures, writes a western man. For a long while I tried all the alleged obesity cures and none of them did me any good. Then I determined to starve myself and take lots of exercise.

All my life I had been a lover of good eating, and counted that day lost on which I did not consume for my dinner the better part of a sirloin steak as thick as a dork's foot, with all the trimmings. For breakfast I usually destroyed a platter of cakes, three eggs and no end of thin-sliced bacon, besides fruits and two cups of coffee.

This lifelong system I abandoned for an entire month, cutting out all the meat and about all the vegetables, a piece of toast and glass of milk taking the place of my morning meals and a little rice being the chief item on the meager dinner bill of fare. Lunch I omitted wholly. In addition I walked at least six miles every day and did all sorts of stunts in my room with a gymnasium outfit. Prior to going to bed I perpetrated all sorts of muscular contortions and rolled on the floor till my body was bruised.

At the end of thirty days I felt fit to run a three-mile foot-race or go in the ring with the champion. About this time it occurred to me that I ought to get weighed and I made a bee line for the scales. My grocer assured me that they were correct to an ounce, but they showed I had gained 14 pounds in the period of my experiment.

Buzzing Sounds Made by Insects.

The different humming or buzzing sound in insects is caused by the vibration of the wings, and the more rapid the vibrations the sharper the sound. Scientists have estimated that the common house fly vibrates its wings about 235 times a second and the honeybee 400 times, though a tired bee moves its wings more slowly and makes a different sound from a fresh one. The butterfly is content to move more slowly and makes no noise.

Push Cart Fortune.

The proprietor of the finest cafe in Los Angeles formerly sold "hot tamales" from a push cart, and although he is now wealthy, he still preserves this old vehicle. In erecting a business block to house his modern restaurant he built a cupola just large enough to contain the old tamale cart, and it may be plainly seen from the street.

An exchange tells the story of a little boy whose mother decided that he was old enough to do without her sitting by him when he was put to bed until he fell asleep. So when one night she kissed the five-year-old and told him he was a big boy and brave enough to go to sleep without his mamma and in the dark, too, he pondered the situation a moment and then said: "Well, wait a minute. I've got to say my prayers again carefuler."—Suburban Life.

Bachelor's Savage Comment.

A wealthy gentleman, who owns a country seat, on one occasion nearly lost his mother-in-law, who fell into a river which flows through his estate. He announced the narrow escape to his friends, expecting their congratulations. One of them—an old bachelor—wrote as follows: "I always told you that river was too shallow."
