Beyond Comprehension.
Kant, whose searching analysis of
the pure reason, probed deeper than
any philosopher before him into the
mystery of consciousness, confessed
that two things filled him with awe, as
beyond the faculty of the human mind
to grasp—the immensity of the starry
heavens, and the moral sense implant-
ed in the soul of man.

Daily Thought.
It is self-evident that if every indi-
vidual would make himself a better in-
dividual the nation would take care
of itself.—The Thoroughbreds.

Hurrah! How's This

Cincinnati authority says corns
dry up and lift out
with fingers.

Ouch ! ! ! ! This kind of rough
talk will be heard less here in town if
people troubled with corns will follow
the simple advice of this Cincinnati
authority, who claims that a few drops
of a drug called freezone when applied
to a tender, aching corn or hardened
callous stops soreness at once, and
soon the corn or callous dries up and
lifts right off without pain.

He says freezone dries immediately
and never inflames or even irritates
the surrounding skin. A small bottle
of freezone will cost very little at any
drug store, but will positively remove
every hard or soft corn or callous
from one's feet. Millions of America's
women will welcome this announce-
ment since the inauguration of the
high heels. If your druggist doesn't
have freezone tell him to order a small
bottle for you.—Adv.

Fiery Red Pimples.
A hot bath with Cuticura Soap followed
by an application of Cuticura Oint-
ment to distressing eczemas, etc.,
proves their wonderful properties. For
free samples address "Cuticura, Dept.
X, Boston." At druggists and by mail.
Soap 25, Ointment 25 and 50.—Adv.

"Father of Fishes."
Probably the most famous of our
fish culturists—by reason of his long
service and remarkable success—was
Seth Green, familiarly known as the
"Father of Fishes." His experiments
began in 1864, and he discovered the
so-called "dry method" of impregna-
tion so extensively used in later-day
practical trout culture. His early work
was done in the Caledonia creek hatch-
ery. The artificial propagation of shad
in the Connecticut river was success-
fully attempted by Seth Green in 1867.

ler.

What is a Branch House?

The Branch House is the place in the packing organization where what the packing plant does for you is put where you can use it.

Both are the natural result of growth and development in the living thing they belong to.

Swift & Company Branch Houses are located in distributing centers all over the country. They are fitted out with refrigerating equipment to keep meat cool, sweet and fresh.

Each one is in personal charge of a man who believes in what Swift & Company is doing for people and wants to help do it.

They are directed by men who have spent years learning how to get **better meat cheaper** to the places where it is needed.

Meat is shipped to the branch houses direct from the packing plants in Swift & Company's refrigerator cars, in such quantities that it can be disposed of while fresh and sweet.

Your meat dealer comes **here** to buy your meat for **you**—unless some-
one else can treat him better than we can.

So you need the branch house in order to live well; and the branch house and the packing plant need each other, in order to be useful to you.

WOMEN OF MIDDLE AGE

**Need Help to Pass the Crisis Safe-

Can be Relied Upon.**

Urbana, Ill. — "During Change of Life,
in addition to its annoying symptoms, I
had an attack of
grippe which lasted
all winter and left
me in a weakened
condition. I felt at
times that I would
never be well again.
I read of Lydia E.
Pinkham's Veget-
able Compound
and what it did for
women passing
through the Change
of Life, so I told my
doctor I would try
it. I soon began to
gain in strength
and the annoying
symptoms dis-
appeared and your Vegetable Compound
has made me a well, strong woman so
I do all my own housework. I cannot
recommend Lydia E. Pinkham's Vege-
table Compound too highly to women
passing through the Change of Life."
