AMERICAN SPIRIT RELIED ON TO WIN.

In the light of succeeding events it is interesting to recall the confidence with which the United States Food Administrator viewed the gloomy outlook in July of 1917, when this country had been in the war for less than four months and the Germans were steadily sending the western front nearer and nearer to Paris.

"Even though the situation in Europe may be gloomy today," he declared in a public statement, "no American who has knowledge of the results already obtained in every direction need have one atom of fear that democracy will not defend itself in these United States."

LOYALTY IN LITTLE THINGS LAST PROOF OF PATRIOTISM

Americans without murmuring cut their sugar allowance from four pounds a month to three and then as long as need be to two pounds for loyalty's sake.

FARMERS SAVE SITUATION.

Government Justified in Stimulation of Pork Production—Sevenfold Increase Over Pre-War Exports.

Through increased production and conservation we will be able this year to export seven times our pre-war average exports of pork products. With the heavy demands added in caring for the millions who have been freed from German oppression, the Department of Agriculture and the Food Administration are justified today in our every action of stimulation of hog production. In the coming year the greatest world shortage will be in fats, and pork will help to save this situation. The efficacy of the policy of stimulated production has built up in this country supplies which will enable us to supply a very large part of the fat deficiency of the world. In beef there must be a shortage in Europe, due largely to limited refrigerator ship capacity. All freezer ships available, however, will be filled by America, Argentina and Australia.

The contribution made by the producers of this country to the war program as applying particularly to animal food products is illustrated by the following:

Reports compiled by the U. S. Department of Agriculture indicate an increase in cattle of 10,238,000 head and 12,441,000 hogs. These figures were compiled to January 1 last.

In this period there was a decrease in sheep of 819,000 head. The indications are that this decrease will show an increase, according to recent reports.

Since January 1 unofficial information indicates an increase in hogs of not less than 8 per cent, and not more than 15 per cent, as compared with one year ago, with an increase in the average weight.

Following the request of the U. S. Food Administration for an increase in hog production for marketing in the fall of 1918 and the spring of 1919 the increase may yield not less than 1,600,000,000 pounds more of pork products than were available last year. Without this increase the shortage of animal food products would have been impossible.

The dressed hog products during the three months ending September 30, 1917, amounted to 903,172,000 pounds, while for the corresponding months of 1918 the dressed hog products totaled 1,277,589,000, an increase of over 374,000,000 pounds for the quarter.

During the same period for 1917 the records of inspected slaughter of dressed beef showed 1,263,000,000 pounds as against 1,454,000,000 pounds for the three month period ending September 1, this year.

America's Pledge of Food Gave Heart to the Allies In Their Darkest Hour

Whatever is necessary America will send. That was America's pledge to the interrelated food council. And because the American food army had hitherto made good they took heart and went forward.

Farm enterprise and much soft corn increased pork supplies, food conservation increased exports—total shipments doubled.

FAITH JUSTIFIED BY EVENTS.

I do not believe that drastic force need be applied to maintain economic distribution and sane use of supplies by the great majority of American people, and I have learned a deep and abiding faith in the intelligence of the average American business man, whose aid we anticipate and depend on to remedy the evils developed by the war.—Herbert Hoover, August 10, 1917.
