The Enterprise reporter made the rounds this week of the different hop yards and found the hop growers in a pleasing mode. Hops never looked better in years and the prevailing market price is causing the grower to wear a smile of satisfaction. Pickers are beginning to ask the grower to reserve a place for them and from present indications there will be plenty of pickers to harvest the crop in September. A rumor was circulated last week that growers were going to pay seventy-five cents this season for picking, but this is absolutely denied, as many growers have contracted their crop at a lower price than the present prevailing market quotations and therefore they will not be in position to pay that price, however, we have been told that the usual price so far as is known, will be paid to pickers. Hop picking will commence early this season and the crop will be very large.

E. Townsend will open up a barber shop in the front of Cox & Martin's pool room.
