To Fill Floor Cracks.
A very complete filling for open cracks in floors may be made by thoroughly soaking old newspapers in a paste made of one pound of flour to three quarts of water, or a less quantity in those proportions. Put one tablespoonful of slum in the mixture and stir thoroughly until brought to a boiling heat. Make the final mixture about as thick as putty and apply with a putty knife. It will harden like paper mache.

WOOD Stone Don't Grow.

Natural agencies operate to form beds of rock such as limestones, etc., just the same as beds of rock now in existence were formed at earlier periods in the earth's history. But the rocks and boulders scattered about the surface of the earth do not grow, notwithstanding the popular belief to the contrary. Instead, they actually diminish in size, owing to the action of frost, wind and other disintegrating agencies.

DESTROYING PRAIRIE DOGS TO SAVE CROPS

Organized Operations Conducted in New Mexico.

Nearly 5,000 Land Owners Took Active Part in Work—Cost for Treatment of Range Land Less Than 4 Cents an Acre.

(Prepared by the United States Department of Agriculture.)

Organized poisoning operations were extended over 1,231,297 prairie-dog-infested acres in New Mexico last year under the co-operative war measure work of the biological survey of the United States department of agriculture, the New Mexico state council of defense, and the extension service of the New Mexico college of agriculture. This included the protection of 212,992 acres of crops in all parts of the state, nearly 5,000 land owners taking active part in the work. The expenditures of the federal and state governments and of co-operators totaled less than \$60,000. The actual cost for the treatment of range land was less than 4 cents an acre. If average crop returns in New Mexico be placed as low as \$20 an acre, the saving in crops alone for this one season is approximately \$500,000. To this should be

added the benefit from the destruction of prairie dogs on over a million acres of range and the consequent increased value in crops and forage for seasons to come. Better organization will result from the experiences of last year, and the biological survey and the authorities in New Mexico are in a position to push much more vigorously the work of clearing the state of prairie dogs. Economy and effectiveness have been increased through recent improvements in poisoning methods and, with the help of legislative measures and the hearty co-operation of all ranchmen, it is hoped that the prairie dog will be entirely eradicated before many years.

NEW MEXICO PRACTICED POISON CONTROL ON 1,231,297 ACRES AGAINST PRAIRIE DOGS LAST YEAR.

added the benefit from the destruction of prairie dogs on over a million acres of range and the consequent increased value in crops and forage for seasons to come. Better organization will result from the experiences of last year, and the biological survey and the authorities in New Mexico are in a position to push much more vigorously the work of clearing the state of prairie dogs. Economy and effectiveness have been increased through recent improvements in poisoning methods and, with the help of legislative measures and the hearty co-operation of all ranchmen, it is hoped that the prairie dog will be entirely eradicated before many years.

EXTRA LABOR BY DULL TOOLS

Average Farmer Does Not Realize Tremendous Amount of Work He is Making Himself.

Labor spent by the farmer in sharpening his tools and implements earns a thousand per cent interest, declares Prof. H. H. Musselman of the Michigan agricultural college. The average farmer is inclined to go along with dull edges, little realizing the tremendous amount of extra labor he is making himself.

Uncle Eben.

"If every small boy could carry out his mother's expectations for his future," said Uncle Eben, "dard have to be several million presidents of the United States all to once."

Power Pays.

It is said that a sewing machine with an individual motor averages 1,000 stitches a minute, while the old foot-driven machine accomplishes only 300 or 400 stitches a minute at most.
