Utilizing Time. "Ladies," announced the president of an afternoon bridge club. "It has been moved and seconded that there shall be no conversation at the card tables. What shall we do with the motion?" "I suggest," said a sprightly member, "that we discuss it while we play."

Has Two Meanings. Troops is used in the plural to mean the same as soldiers, and not including in its meaning the number or whether infantry, cavalry or artillery. The word as generally used in the papers has this meaning. Therefore 2,000 troops means 2,000 soldiers. In the strict cavalry use of the word, however, a troop is the unit of formation, consisting usually of 80 troopers, commanded by a captain and corresponding to a company of infantry.

Art's Inspiration. A famous artist, who had art classes, had forbidden smoking in his studio. One day, after being out for half an hour, he re-entered the studio suddenly and saw one student with a lighted cigarette in his fingers, which he tried to conceal. With an air of assumed offender and said: "A strange crayon you have there, my friend. May I ask you what you propose to draw with that?" "Clouds!" replied the student.

LABOR SITUATION IS LESS SEVERE

Improvement Is Reported by Bureau of Crop Estimates After Investigation.

WAGE RATE NOT CONSIDERED

Actual Supply of 1919 Was 83 Per Cent Against 72 Per Cent One Year Ago—Less Favorable on the Atlantic Coast.

(Prepared by the United States Department of Agriculture.) Improvement in the farm labor situation this year over 1918 is reported by the bureau of crop estimates, United States department of agriculture, after investigation in all agricultural counties of the United States. By improvement is meant net increase of supply and consequently more labor for planting, cultivating and harvesting in relation to the work to be done. Wage rates were not included in the investigation.

Improvement in 1919. Stated in percentage of a normal labor supply as related to a normal demand for labor, the actual supply of 1918 was 72 per cent and of 1919 it is 83 per cent—still inadequate without greater than normal dependence on machinery and animal, tractor and motor power, and without more than usual labor by farmers and their families. However, the improvement over 1918 is considerable.

In both years the groups of states that were and are provided with labor in relation of supply to demand, less than, or at the most equal to, the average for the United States, are the North Atlantic, the South Atlantic and the South Central.

Among these three groups of states, the greatest improvement is in the North Atlantic and the least is in the South Atlantic, and these extremes of high and low improvement are not equaled by the North Central and Western states, in each of which the average improvement is almost the same as that of the entire country. The improvement is evenly distributed throughout all state groups, except the North Atlantic states, where the gain is twice as great as in each of the other groups of states.

Situation Is Worse. Apart from tendency toward relief from labor scarcity from 1918 to 1919, the situation this year is less favorable on the Atlantic coast, from New England to the South Atlantic states as a group, than in the states west of the Appalachian mountains as groups, and in this long strip of coast the situation is worse in the South Atlantic group of states.

Utilizing Time. "Ladies," announced the president of an afternoon bridge club. "It has been moved and seconded that there shall be no conversation at the card tables. What shall we do with the motion?" "I suggest," said a sprightly member, "that we discuss it while we play."

Crees Wonderful Canoeists. "The Ojibway, the Cree and the Montagnais are the most wonderful canoeists in the world," says S. E. Sangster, writing of "The Woods Indian" in Boys' Life. "They possess a sixth sense in rapid-running and if they say 'run if you can safely by a bet at odds that they will run it' and come through dry—even through water—the mere glimpse of which makes your hair stand up and sends chills chasing up and down your spine."

There is no better place for turkeys to roost than in the trees. In the open air, during the summer and fall.

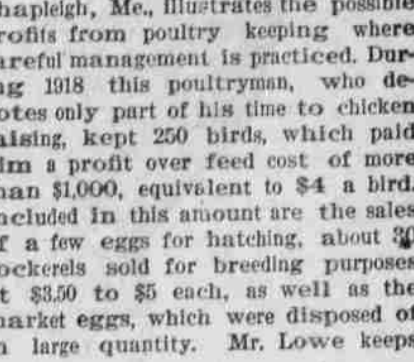

Chicks that get too warm in coops do not grow well and therefore do not make the best use of their feed and opportunities.

If the wing feathers of little chicks grow too rapidly and make the wings hang down they should be cut off so that they will not sap the vitality of the chicks.

POULTRY FACTS

PURE-BRED POULTRY IS BEST Growers Everywhere Are Coming to Realize That There is More Money in Standard Breeds.

(Prepared by the United States Department of Agriculture.) The story of Reuben Love of North Shapleigh, Me., illustrates the possible profits from poultry keeping where careful management is practiced. During 1918 this poultryman, who devotes only part of his time to chicken raising, kept 250 birds, which paid him a profit over feed cost of more than \$1,000, equivalent to \$4 a bird. Included in this amount are the sales of a few eggs for hatching, about 30 cockerels sold for breeding purposes at \$3.50 to \$5 each, as well as the market eggs, which were disposed of in large quantity. Mr. Lowe keeps

Maine Poultryman Realizes \$4 a Bird From His White Wyandottes.

White Wyandottes of a strain that wins in the show ring when judged according to either the standard of perfection or a utility standard. One pen of 20 pullets owned by this Maine poultry raiser produced eggs as follows: November, 1918, 413; December, 1918, 418; January, 1919, 380; February, 1919, 328; March, 1919, 456; a total of 1,993 eggs, averaging 99.85 eggs per bird in five months.

It pays to keep poultry of this kind, and growers everywhere are coming to realize that there is more money in keeping better fowl and feeding them properly balanced rations than in wasting time with inferior birds.

OHIO LICE POWDER FORMULA

Mixture of Gasoline, Carbolic Acid and Plaster of Paris is Inexpensive and Efficient.

One of the cheapest home-made lice powders for poultry is made by mixing three parts of gasoline and one part of crude carbolic acid with as much plaster of paris as the liquid will moisten, as determined by the Ohio experiment station. The powder is allowed to dry before using; it may be kept in an air-tight container where it retains its strength for a long period. The powder is inflammable and must be kept away from fire.

Infested fowls when thoroughly dusted are soon relieved from the attacks of lice; about 125 birds may be dusted in one hour, one pound of the mixture being needed to dust ten mature fowls.

For head lice on chickens the use of blue ointment or mercurial ointment has been found effective. One part of the ointment is mixed with two parts of vaseline and a lump of the mixture about the size of a pea is rubbed thoroughly at the base of the feathers about the head.

WHEN FOWLS BEGIN TO MOLT

Plenty of Good Food in Considerable Variety is Essential to Maintain Good Health.

When the fowls begin to shed their feathers be sure that they have plenty of good food, in considerable variety, so they can maintain their health and strength and at the same time grow a perfect new set of feathers.

DOULTRY NOTES

Bran is a good ration for poultry of all ages. Purchase well-matured pullets rather than hens. Having movable, separate nest boxes makes it easier to clean them as well as the house. Don't expect great success in hatching and raising chicks unless you have had some experience. There is no better place for turkeys to roost than in the trees. In the open air, during the summer and fall. Chicks that get too warm in coops do not grow well and therefore do not make the best use of their feed and opportunities. If the wing feathers of little chicks grow too rapidly and make the wings hang down they should be cut off so that they will not sap the vitality of the chicks.
