## Mexico Murder Map

Theodore Roosevelt, in a powerful speech delivered at Phoe-nix, Ariz., October 21, 1916, indicted the Wilson administration for its vacillation and timidity in dealing with Mexico. He charged that Americans had been the victims of "murder, outrage and plunder"; that the government at Washington afforded them no protection whatever, and that "neither the promises and menaces of President Wilson nor the pledges in Democratic platforms were worth the paper on which they were written or the breath expended in uttering them."

The conditions depicted then are the conditions, intensified, existing today.

Over three years ago-on June 20. 1916-President Wilson through his Secretary of State, admitted that there had been continuous bloodshed and disorder in Mexico and that Americans had been barbarously murdered and vast properties developed by Ameri-

can capital and enterprise destroyed. Six years ago-August 27, 1913-President Wilson specifi-cally promised to protect Americans and "vigilantly watch the fortunes of those Americans who cannot get away," and on the same date instructed the American Consul General and consular agents in Mexico "to notify all officials, military or civil exercising author ity, that they pould be held strictly responsible for any harm done

to Americans or for injury to their property." "These were fine words," said Theodore Roosevelt. "Excellent words

But they meant nothing-absolutely nothing. Words, words, words!

Since they were uttered the situation has gone from bad to

A map has just been prepared and submitted to the State Department and to the Senate Committee on Foreign Relations which shows that 551 American lives have been sacrificed to Mexican lawlessness during the Carranza regime. Of this number 123 mem-bers of the military forces of the United States-American soldiers and sailors-were killed !

This graphic presentation-called the "Murder Map of Mexico"-has created the most profound impression at Washington and throughout the country. It emphasizes strikingly Theodore Roose-velt's indictment of the administration in 1916 for its weakness and vacillation in dealing with problems across the border.
