A Practical Farm Machine

THAT International kerosene tractors are practical farm machines has been demonstrated beyond doubt by the records of International tractors on thousands of American farms for the last fourteen years. Not only are they dependable, but as compared with gasoline-driven tractors of the same rated horse power they show a clear saving of from 50 to 60 per cent on cost of fuel used.

International 8-16 Kerosene Tractor

This strong, light-weight tractor is especially adapted for the average farm. In the field, on the road or at the belt it busies itself getting work out of the way in record time.

To be sure your farm work is kept up-to-the-minute and to guard against costly delays place your order now for an International. Think of the scores of jobs it can do for you at a satisfying saving in time and labor—how well they will be done and at what little expense. Your tractor can be delivered when you want it if you place your order soon.
