Myrtle Point—New Packing plant to be erected. North Powder—Work on new water system to start at once. Hood River—New highway in Hood River and Wasco county completed.

These Tires Are a Revelation

The Brunswick is frankly a combination of the best in tire building. There is one tread that's supreme beyond question. And that is now on Brunswicks. There is one side-wall construction, which, by every test, holds the summit place for endurance.

Merton G. Ellis et ux to Catharine Wonderly, 6 lots in Block N. Falls City, q. d. \$1.00.

SPORES SCATTERED BY WIND

Remarkable Reproduction of Species of Fungus is One of the Wonders of Nature.

We often wonder at the amazingly sudden upspringing of mushrooms and toadstools. Today the green of the lawn is unbroken. In the night a gentle rain falls, and we wake to see a crowded group of yellowish-white "inkycaps" spreading their parasols in the very shadow of our doorstep.

Each species of fungus produces upon or within some part of its fruit body countless numbers of minute reproductive bodies called spores.

The amazing number of spores produced by a single fungus can be realized only by knowing their relative size. Thus in the case of most puffballs at least three thousand of the globular spores, when laid side by side, would be required to form a line one inch long.

The only evident reason for the change seems to be the fact that the process that converts soft birch into a hard pipe was originated in a Latin American country, according to the New York Evening Sun.

Birchwood owes its new name and its present prominence in the pipe industry to the war, which cut off the supply of lign and sent the prices of the stocks in America sky high.

Substitutes have been sought for the expensive imported briar. The cessation of importations with the war—they haven't been resumed yet—intensifies the search for an American wood that would provide a suitable substitute.

Many native hardwoods were tried without success. Most of them were either too hard to be worked into pipes or too heavy to rest comfortably between a smoker's lips.

Then some one hit on the expedient of trying a soft wood and employing a process that would give it the required hardness for use in pipe manufacturing.

Birch was found the most suitable for the purpose.

PIPE MAKERS USING BIRCH

Wood Has Been Found to Be Eminent ly Suitable, After Treatment by a Special Process.

Stay Young

As the years overtake you, reading becomes increasingly difficult without proper glasses. Our Lenses make reading a comfort; prevent wrinkles from eyestrain and preserve perfect and clear vision. Come to us and have your eyes examined and your glasses made—All work guaranteed.
