

Watches

One of the first essentials of a successful jeweler is reliability. Before you make an investment in a watch you want assurance of getting value received. In order to do this you must have confidence in the one who sells it to you. You want to know that when you buy a watch both the case and the works are what they are represented to be.

There is no misrepresentation about our watches. Whether you want one costing \$2.50 or \$100, you will receive the same careful consideration. You will be told exactly what it is, and what you can expect it will accomplish for you.

I am in the jewelry business for keeps. And I realize that the biggest asset that I can hope to gain is a reputation for strict reliability.

Carried in stock are some very pleasing designs in watches and it is really surprising to note the moderate prices. Less than you can buy them in Portland from reliable jewelers.

It will be a pleasure to talk watch with you.
