

Watches

One of the first essentials of a successful jeweler is reliability. Before you make an investment in a watch you want assurance of getting value received. In order to do this you must have confidence in the one who sells it to you. You want to know that when you buy a watch both the case and the works are what they are represented to be.

There is no misrepresentation about our watches. Whether you want one costing \$2.50 or \$100, you will receive the same careful consideration. You will be told exactly what it is, and what you can expect it will accomplish for you.

I am in the jewelry business for keeps. And I realize that the biggest asset that I can hope to gain is a reputation for strict reliability.

Carried in stock are some very pleasing designs in watches and it is really surprising to note the moderate prices. Less than you can buy them in Portland from reliable jewelers.

It will be a pleasure to talk watch with you.

The Tractor That Stays

It is pretty generally accepted now that the farm power of the future will be generated by kerosene and other low-grade, low-priced fuels. A tractor that operates successfully on these fuels, insuring dependable power at draw-bar and belt, is the tractor that will stay because it will pay.

International 8-16 Tractor

has established its reputation for satisfactory performance in the school of experience. It has passed successfully through long and rigid tests under actual field conditions in all sections of the country.

Belt work is becoming more and more important. The use of small threshers, ensilage cutters, etc., combined with a suitable tractor, is making the farmer more and more independent.

All of this emphasizes the value to you of an International 8-16 tractor that is designed to do tip-top belt work as well as taking care of field and road jobs.

Place your order now and avoid shipping delays.
