Publication September 17,

1920.

SUMMONS.

the Circuit Court of the State

for the County of Polk,

Shant No. 2.

Emmenegge, Plaintiff,

vs.

Emmenegge, Defendant.

The NAME OF THE STATE

OREGON, you are hereby re-

quired to appear and answer the

complaint herein filed in the above

Cause and Court within six

months from the time of publi-

cation of this Summons, to-wit:

August 20, 1920; and if you fail so

to appear and answer said Com-

plaint, Plaintiff will apply to the

Court for the relief

therein prayed for in said Complaint, to-

wit: a decree of divorce against

the defendant on the ground of willful deser-

tion for such other and further

relief as the Court may deem equi-

table.

You are hereby notified that this

summons is served upon you by pub-

lication thereof in the "Independence

Enterprise," a weekly newspaper of

general circulation, printed and pub-

lished at Independence, Polk County,

Oregon, pursuant to the order of

Honorable A. B. Robinson, Judge

County Court, made on the 6th

day of July, 1920, and you are fur-

ther notified that the date of the first

publication of this Summons is July

1920, and the last publication

thereof will be August 20th, 1920.

D. E. FLETCHER,

Attorney for Plaintiff,

Independence, Oregon.

CUTTING THIRD SET OF TEETH

Memphis (Tenn.) Man, at 84, is Also
Renewing His Youth and Vigor
in Other Ways.

The advice that there is nothing new under the sun has been disproved by N. D. Starr, who has cut a third set of teeth at the age of eighty-four, when usually the only new molars, bicuspids, etc., that can be achieved are those purchased from a dentist, says the Memphis Commercial Appeal.

Mr. Starr, who is in the employ of the Memphis Artesian Water company, recently found himself in need of a set of these artificial substitutes for the teeth provided by nature. But when he visited his dentist the price was too high and he decided to go toothless. However, through one of the uncountable happenings which sometimes upsets all rules, Mr. Starr discovered that he was cutting 12 new teeth. They are almost through now, although they are not very useful yet, owing to the fact that his gums are sore in a fashion familiar to all mothers of teething infants or to boys and girls whose second teeth are replacing their baby teeth, and even the older boys and girls who proudly announce: "I'm cutting a wisdom tooth."

Dentists doubtless will contend that such a thing cannot happen. But Mr. Starr knows that he now has teeth where no teeth were before. Moreover, he says his eyesight is better than it was several years ago, and that so far from his vigor being impaired by advancing years he feels stronger and more youthful than he did when he was seventy.

TELL OF BABYLONIAN LIFE

Interesting Revelations in Clay Tablets
That Were "Written" On Some
Forty Centuries Ago.

The University of South Dakota at Vermillion has come into possession of 61 genuine Babylonian tablets, discovered by Arabs in the ruins of buried cities and collected at Bagdad. They have been deciphered by Dr. Edgar J. Banks of Alpine, N. J., an authority on these clay and brick records of 4,000 years ago, and their authenticity proved. Fully half of the tablets in this collection are perfect and all of them are legible. They are only a few inches in size and were written on when they were soft clay, later being dried, or baked. Most of them are of about the date 2350 B. C., a few going as far back as 2800 B. C., and others dating from the time of the fall of Babylon before the Persians, in 538 B. C. The most valuable tablet of the collection is a letter. Holes were made through it so that it might be attached to a cord and carried in this way. Next in point of value and interest are a number of neo-Babylonian tablets of sundried clay containing business contracts of all sorts and giving pictures of the life of the people after the Persian conquest. Of special interest is a small tablet of exercises in writing, done by some boy in the temple school over 40 centuries ago.

Iceberg Acrobat.

The sighting of a fleet of 14 icebergs, one with somersaulting tendencies, was reported by Capt. W. H. Fleming recently on the arrival here of the steamship Munales from Rotterdam.

The bergs were seen about 750 miles east of Halifax. One of them, said Capt. Fleming, suddenly rolled over with a splash. As it tumbled, a large piece from the top was broken off, causing the berg to take a second tumble. As it was righting, another section broke off, and for the third time the berg turned over. It was about a mile astern of the vessel.—New York World.

A Good Catch.

It is impossible to repress a feeling of satisfaction over the feat of the Atlantic City game warden, who apprehended the owner of a seaplane guilty of shooting wild geese in the air. The law against this sort of "sport" is strict, and the penalty provided for offenders is ample. And, as bird shooting from the air is on a plane with the use of dynamite and seines in closed waters, the more rigidly the statute is enforced the better. Any leniency would be disastrous to the bird life of the country and calamitous to the United States.—Detroit Free Press.

No Way for Ladies to Act.

Scene, a crowded restaurant; dramatic personae, the proprietor, sleek, prosperous, pompous; a doorman—a dejected attendant, rolling anxious, furtive eyes in every direction to find out whether a customer had skipped without cashing in his meal check properly. For a few moments, however, attendant relaxes, heavy eyes almost close and vigilance abates.

On this peaceful lassitude falls the voice of the proprietor. "Here, you, Joe, get on your job. Didn't you notice them two ladies over there beating it out without paying their bill?"—Rebo-both Sunday-Herald.

On Trial.

Customer—I'm mighty particular about how my hair is cut. Do you think you can do a good job on it?

Barber—Well, I'm reckoned fairly decent, but if you want I'll do one side of your head first so you can see how you look.—American Legion Weekly.

Acquiring Sense.

"I'm teaching my boy to paddle his own canoe."

"And a good idea, too. Then he won't be so apt to rock the boat."

NEW CHANNEL-SWEEPER IDEA

Claimed That it Will Be of Vast Im-
portance in the Maintenance
of Barge Canals.

To aid in the maintenance of the New York state barge canal, a channel sweeper has been devised, not heretofore demanded by the construction of the older canals, writes Gordon P. Gleason in Popular Mechanics Magazine. As time goes on and the banks disturbed by recent excavations assume their natural slopes, the need of dredging will become less. Investigations, however, show that within one year sufficient material may be deposited within the canal to make the available depth of water considerably less than the prescribed 12 feet. An example of this was found in the channel east of Oneida lake. This was completed in a full 12-foot depth in 1900, yet, in 1917, it was so washed in with sand that it was necessary to remove thousands of cubic yards of this material.

To aid in the locating of obstructions in the canal the state engineer has designed a novel channel sweeper, and boat builders have been asked to submit estimates as to the cost of these so that three of them may be placed on the canal.

The new sweeper consists of two boats, each 18 feet long and 6 feet wide. These are placed 15 feet apart and joined by timbers. An operating floor 30 feet long and 5 feet wide will be constructed near the stern, and suspended from this will be a 60-pound rail, 30 feet long, held by two chains at each end.

STRATEGY FAILED TO WORK

Last Resort of "Locked Out" Son-in-
Law Only Served to Make Mat-
ters Worse.

His mother-in-law is deaf, "thick o' hearin'," as they said in the old days. Mother-in-law went to the movie the other evening and, before leaving the house, requested that if the other members of the household went out the key be left in the mail box. The others did go out and the key was left in the designated place. When they returned the key was missing. Mother-in-law had locked the door and carried the key inside. She was seen sitting near an upstairs window, reading. The doorbell was rung until it ran down. The telephone did not reach her ears. Those left out in the cold, cold world were in despair. The neighborhood had been aroused by the noise made in attempting to make mother-in-law's defective hearing take spark. She read peacefully on.

Finally Mr. Son-in-Law had a happy thought. He would try strategy. He turned the hose on her window.

Mother-in-law thought it was raining, got up and closed all the upstairs windows and went back to her book. Strategy had not only failed, but had tightened the barrier of sound.

It was not learned just how those outside got inside.—Indianapolis News.

"Deadwood Dick" English Born.

Richard Bullock, known as "Deadwood Dick," was born at Cornwall, England, some eighty years ago. At the age of twenty-one he came to America and at length drifted to the West. For a while he worked in the mines in the Black Hill country. At that time miners there were greatly discouraged and vexed by the unusual activity of bandits. Desperadoes operating individually and in groups were holding up stages running between the mining country and the settlements in the East with such regularity that chances of getting their gold shipments through were slim.

Bullock saw in this situation an opportunity to do the miners a good turn and himself, too, to earn a good livelihood and to enjoy no end of thrills and adventures. So he laid away his pick and shovel, armed himself with a wicked-looking gun and embarked in the business of hunting "road agents."

A "Burning Well."

Water and fire aren't usually considered good friends, but under certain circumstances they may unite to form an interesting and beautiful natural phenomenon. This is the case near Mobile, Ala., where for years a "burning well" has been the center of attraction for visitors and residents of the city. Bored originally for an artesian well, the product of the hole was a tremendous flow of salt water, heavily charged with chlorine gas.

How this gas first took fire is not known, but burn it does, and the deep orange flames, uninjured by the water, not only spurt high with the flow of the crystal stream and color its white foam, but they run along the circular pool about the well in continuous sweeps of bright color.

Celluloid Collar Swimming Aid.

The timid beginner can learn to swim in ten minutes, it is claimed, if he wears about his neck the new "swimming collar."

This collar, as described in Popular Mechanics Magazine, consists of a cylinder of transparent celluloid, about eight inches high. Across the bottom is cemented a rubber sheet with a central aperture. The edges of the aperture fit snugly about the neck. Thus the new swimming aid holds the head above the water, and recommends itself to fair swimmers because it keeps the hair dry.

Let's Have the Sugar.

The insular government is trying to produce cheap sugar and alcohol from the Philippine nipa palm, the islands having more than 100,000 acres of the trees.

The Olympic Line

Appeals to Your Appetite
And Appeases It, Too

For a dainty but satisfying breakfast serve **OLYMPIC** Wheat Hearts. You'll find "The Meat of the Wheat" in every heart. Let this tasty cereal whet your appetite to bigger breakfasts. A good breakfast starts a perfect day.

If you are using **OLYMPIC** Flour for baking, it is time you tried its little brother, **OLYMPIC** Pancake Flour. From the same reliable millers.

It isn't the amount you feed that counts—it is the amount assimilated that builds. **OLYMPIC** Stock and Poultry Feeds—easily assimilated themselves—make "rib-sticking" material out of other feed stuffs.

OREGON JERSEY AWARDED
GOLD AND SILVER MEDAL

Through the exceptional production ability of his daughters, Silver Chimes of S. B. 96021, has been awarded a gold and a silver medal, the two highest honors given to Jersey bulls by the American Jersey Cattle Club.

Silver Chimes of S. B. is owned by Del Perkins of Carlton, Oregon, and is the fourth bull owned in Oregon to win the coveted gold medal.

The requirements for a gold medal are that a bull have at least three daughters (out of different dams) which have produced 700 pounds or more of fat in one year, and which have carried a living calf at least 155 days during the test. It will be seen that the requirements not only encourage high production records, but they encourage high records made while in calf. Only ten Jersey bulls have won this medal, so Oregon may well be proud of the fact that four of them are owned in that state.

The three daughters whose records made it possible for Silver Chimes of S. B. to win the gold medal are:

Silver Chimes' Rua, 325025, 4 yrs. 2 mos., 11,901.2 lbs. milk, 784.49 lbs. fat.

Gwendola Olga Chimes, 325849, 4 yrs. 1 mo., 15,958.2 lbs. milk, 812.44 lbs. fat.

Rosaire's Chimes, 329913, 5 yrs. 7 mos., 13,644.9 lbs. milk, 828.32 lbs. fat.

To win a silver medal a bull must have at least three daughters (out of different dams) that have produced a required amount of fat in one year and which have carried a living calf at least 155 days during their tests. A cow, which begins her test at the age of two years and ninety-five days or less, must produce at least 500 pounds of fat during the year. For every day over that age she must produce an additional two-tenths of a pound of fat up to the age of five years, when the required amount of butter fat will have reached 700 pounds. Silver Chimes of S. B. is the ninth winner of this medal.

The records made by Silver Chimes' Rua and Gwendola Olga Chimes both meet the requirements which entitle their sire to the silver medal and the record made by another daughter, Silver Chimes' Gwendola, makes the necessary third.

At the age of one year and eleven months Silver Chimes' Gwendola 404304 produces 10,798.8 pounds of milk, 644.2 pounds of fat, which at that time was a high record for a Jersey yearling.

All told, Silver Chimes of S. B. has sixteen daughters in the Register of Merit. Other daughters in the Perkins herd are now on test and are making splendid records, so it will not be long before his list of Register of Merit daughters will be greatly increased. Betsey's Stockwell 84410, a son of Imported Stockwell, that sold for \$11,500, is sire of Silver Chimes of S. B., and Silver Chimes Duchess 230642 is his dam.

James Cairnes, wife and daughter, from Rhineland, Wis., have purchased property at Dallas with the expectation of making that city their home.

Let's settle
this right now!

No man ever smoked a
better cigarette than Camel!

You'll find Camels unequalled by any cigarette in the world at any price because Camels combine every feature that can make a cigarette supreme!

Camels expert blend of choice Turkish and choice Domestic tobaccos puts Camels in a class by themselves. Their smoothness will appeal to you, and permit you to smoke liberally without tiring your taste!

Camels leave no unpleasant cigarette aftertaste nor unpleasant cigarette odor!

You'll prefer Camels blend to either kind of tobacco smoked straight!

Camels are sold everywhere in scientifically sealed packages of 20 cigarettes for 20 cents; or ten packages (200 cigarettes) in a glassine-paper-covered carton. We strongly recommend this carton for the home or office supply or when you travel.
